Bruges Andrew Brown, Jan Dumolyn, 2018-05-03 Bruges was undoubtedly one of the most important cities in medieval Europe Bringing together specialists from both archaeology and history this total history presents an integrated view of the city's history from its very beginnings tracing its astonishing expansion through to its subsequent decline in the sixteenth century The authors analysis of its commercial growth industrial production socio political changes and cultural creativity is grounded in an understanding of the city's structure its landscape and its built environment More than just a biography of a city this book places Bruges within a wider network of urban and rural development and its history in a comparative framework thereby offering new insights into the nature of a metropolis Bruges, Cradle of Capitalism, 1280-1390 James M. Murray, 2005-01-20 Teeming with merchants from all over Europe medieval Bruges provides an early model of a great capitalist city Bruges established a sophisticated money market and an elaborate network of agents and brokers Moreover it promoted co operation between merchants of various nations In this book James Murray explores how Bruges became the commercial capital of northern Europe in the late fourteenth century He argues that a combination of fortuitous changes such as the shift to sea borne commerce and the extraordinary efforts of the city's population served to shape a great commercial centre Areas explored include the political history of Bruges its position as a node and network the wool cloth and gold trade and the role of women in the market This book serves not only as a case study in medieval economic history but also as a social and cultural history of medieval Bruges **High Germans in the Low Countries** Donald

Harreld, 2004-11-01 This volume looks at the South German merchant community during Antwerp's Golden Age by examining German involvement in the social life of the city as well as by tracing merchants commercial activities The first section of the book considers the institutions of trade and the role Germans played in their development and how Germans interacted with other foreign merchant communities The second section takes a wider view by tracing the commercial networks that South

German merchants operated in and by quantifying South German participation in Antwerp's foreign trade

Visby-Colloquium des Hansischen Geschichtsvereins 15.-18. Juni 1984 Hansischer Geschichtsverein (Lübeck, Germany), 1987 *Cities of Commerce* Oscar Gelderblom, 2015-12-29 Cities of Commerce develops a model of institutional change in European commerce based on urban rivalry Cities continuously competed with each other by adapting commercial legal and financial institutions to the evolving needs of merchants Oscar Gelderblom traces the successive rise of Bruges Antwerp and Amsterdam to commercial primacy between 1250 and 1650 showing how dominant cities feared being displaced by challengers while lesser cities sought to keep up by cultivating policies favorable to trade He argues that it was this competitive urban network that promoted open access institutions in the Low Countries and emphasizes the central role played by the urban power holders the magistrates in fostering these inclusive institutional arrangements Gelderblom describes how the city fathers resisted the predatory or reckless actions of their territorial rulers and how their nonrestrictive approach to commercial life succeeded in attracting merchants from all over Europe Cities of Commerce intervenes in an important debate on the growth of trade in Europe before the Industrial Revolution Challenging influential theories that attribute this commercial expansion to the political strength of merchants this book demonstrates how urban rivalry fostered the creation of open access institutions in international trade **Kredit im spätmittelalterlichen und frühneuzeitlichen Europa** Michael North, 1991
