

The ARM logo is displayed in white, bold, sans-serif capital letters against a solid teal background in the top right corner of the cover.

ARM

The background of the cover is a detailed, artistic illustration. It depicts a hand holding a transparent, glowing blue rectangular object that resembles a circuit board or a data storage device. The hand is rendered in a soft, painterly style. The overall color palette is dominated by blues and teals, with some warmer tones in the hand and the glowing object. The illustration has a dreamlike, ethereal quality.

 held in Vienna Austria September 24-26 2003 Initially the workshop was referred to as the International Workshop on Code
 Generation for Embedded Systems The first workshop took place in 1994 in Schloss Dagstuhl Germany From its beginnings the
 intention of the organizers was to create an atmosphere in which the researchers could participate actively in dynamic
 discussions and profit from the assembly of international experts in the field It was at the fourth workshop in St Goar Germany
 in 1999 that the spectrum of topics of interest for the workshop was extended and not only code generation but also software
 and compilers for embedded systems were considered The change in fields of interest led to a change of name and this is when
 the present name was used for the first time Since then SCOPES has been held again in St Goar Germany in 2001 Berlin
 Germany in 2002 and this year 2003 in Vienna Austria In response to the call for papers 43 very strong papers from all over
 the world were submitted The program committee selected 26 papers for presentation at SCOPES 2003 All submitted papers
 were reviewed by at least three experts in order to ensure the quality of the work presented at the workshop Symbian OS

submissions The papers focus on parallel and distributed computing from the perspectives of algorithms networking and
architecture software systems and technologies and applications Besides classical topics from high performance computing
major recent developments are addressed such as molecular computing data mining knowledge discovery optical networks

with great pleasure that I welcome you to Lake Tahoe for the 2005 International Symposium on Visual Computing ISVC ISVC
provides a common umbrella for the four main areas of visual computing vision graphics visualization and virtual reality The
goal of ISVC is to provide a common forum for researchers scientists engineers and practitioners throughout the world to
present their latest research findings ideas developments and applications in the broader area of visual computing The
program consists of six oral sessions two poster sessions seven special tracks four keynote presentations
and one invited presentation The response to the call for papers for the general ISVC 2005 sessions was very good We received
over 110 submissions from which we accepted 33 papers for oral presentation and 26 papers for poster presentation Special track
papers were solicited separately through the organizing and program committees of each track A total of 32 papers were
accepted for inclusion in the special tracks All papers were reviewed with an emphasis on their potential to contribute to the
state of the art in the field Selection criteria included accuracy and originality of ideas clarity and significance of results and
presentation quality The review process was quite rigorous involving two or three independent double blind reviews followed
by a one week discussion period During the discussion period we tried to correct anomalies and errors that might have existed
in the initial reviews Despite our efforts we recognize that some papers worthy of inclusion may not have been included in the
program We offer our sincere apologies to authors whose contributions might have been overlooked
I wish to thank everybody who submitted their work to ISVC 2005 for review
