engineering contains 26 completely new chapters and updates most other chapters. It offers design concepts, specifications and practice as well as the various types of bridges. The text includes over 2,500 tables, charts, illustrations and photos. The book covers new innovative and traditional methods and practices, explores rehabilitation, retrofit and maintenance, and examines seismic design and building materials. The second book, *Superstructure Design*, contains 19 chapters and covers information on how to design all types of bridges. What's New in the Second Edition includes two new chapters: *Extradosed Bridges* and *Stress Ribbon Pedestrian Bridges*. Updates the *Prestressed Concrete Girder Bridges* chapter and rewrites it as two chapters: *Precast Pretensioned Concrete Girder Bridges* and *Cast In Place Post Tensioned Prestressed Concrete Girder Bridges*. Expands the chapter on *Bridge Decks and Approach Slabs* and divides it into two chapters: *Concrete Decks* and *Approach Slabs*. Rewrites seven chapters: *Segmental Concrete Bridges*, *Composite Steel I Girder Bridges*, *Composite Steel Box Girder Bridges*, *Arch Bridges*, *Cable Stayed Bridges*, *Orthotropic Steel Decks and Railings*. This text is an ideal reference for practicing bridge engineers and consultants, design, construction, maintenance, and can also be used as a reference for students in bridge engineering courses.

Bridge Inspection Practices George Hearn, National Cooperative Highway Research Program, 2007. This synthesis reports bridge inspection practices in the United States and selected foreign countries. The synthesis is a collection of information on formal inspection practices of departments of transportation (DOTs). These are primarily visual inspections and they provide data to bridge registries and databases. For U.S. inspection practices, this synthesis reports on inspection personnel, inspection types, and inspection quality control and quality assurance. Staff titles and functions in inspection programs are reported together with qualifications and training of personnel, formation of inspection teams, and assignment of teams to bridges. Inspection types are described in terms of their scope, methods, and intervals. Quality control and quality assurance programs are reviewed in terms of the procedures employed, staff involved, quality measurements obtained, and the use of quality findings in DOT inspection programs. Foreign practices are presented in the same organization of inspection personnel types and quality programs. Comparisons of U.S. and foreign inspection practices are included. Information was obtained from a questionnaire sent to U.S. state transportation departments, similar questionnaires modified individually for transportation agencies in selected foreign countries, and formal documents used by transportation departments and agencies. These documents primarily included bridge inspection manuals, inspection training manuals, and technical memoranda, but also included blank forms for inspections, DOTs job descriptions for inspectors, and descriptions of inspection training courses. Overall, this synthesis includes information from forty U.S. state transportation departments and from roads agencies in eight foreign nations: Denmark, France, Finland, Germany, Norway, South Africa, Sweden, and the United Kingdom. The synthesis also includes in an appendix information from a few provincial and municipal transport agencies in Canada.
