Fun with Algorithms Pierluigi Crescenzi, Giuseppe Prencipe, Geppino Pucci, 2007-06-27 This book constitutes the refereed proceedings of the 4th International Conference on Fun with Algorithms FUN 2007 held in Castiglioncello Italy in June 2007 It details the use design and analysis of algorithms and data structures focusing on results that provide amusing witty but nonetheless original and scientifically profound contributions to the area Computational Intelligence for Modelling, Control & Automation Masoud Mohammadian, 1999 This edited Book is dedicated to the theory and applications of Evolutionary Computation and Fuzzy Logic for Intelligent Control Knowledge Acquisition and Information Retrieval The book consists of 86 selected research papers from the 1999 International Conference on Computational Intelligence for Modelling Control and Automation CIMCA 99 The research papers presented in this book cover new techniques and applications in the following research areas Evolutionary Computation Fuzzy Logic and Expert Systems with their applications for Optimisation Learning Control Scheduling and Multi Criteria Analysis as well as Reliability Assessment Information Retrieval and Knowledge Acquisition *Evolutionary Algorithms in Engineering Applications* Dipankar Dasgupta, Zbigniew Michalewicz, 2013-06-29 Evolutionary algorithms are general purpose search procedures based on the mechanisms of natural selection and population genetics They are appealing because they are simple easy to interface and easy to extend This volume is concerned with applications of evolutionary algorithms and associated strategies in engineering It will be useful for engineers designers developers and researchers in any scientific discipline interested in the applications of evolutionary algorithms The volume consists of five parts each with four or five chapters The topics are chosen to emphasize application areas in different fields of engineering Each chapter can be used for self study or as a reference by practitioners to help them apply evolutionary algorithms to problems in their engineering domains **Intelligent Problem Solving. Methodologies and Approaches** Rasiah Logananthara, Günther Palm, Moonis Ali, 2003-07-31 The focus of the papers presented in these proceedings is on employing various methodologies and approaches for solving real life problems Although the mechanisms that the human brain employs to solve problems are not yet completely known we do have good insight into the functional processing performed by the human mind On the basis of the understanding of these natural processes scientists in the field of applied intelligence have developed multiple types of artificial processes and have employed them successfully in solving real life problems The types of approaches used to solve problems are dependant on both the nature of the problem and the expected outcome While knowledge based systems are useful for solving problems in well understood domains with relatively stable environments the approach may fail when the domain knowledge is either not very well understood or changing rapidly The techniques of data discovery through data mining will help to alleviate some problems faced by knowledge based approaches to solving problems in such domains Research and development in the area of artificial intelligence are

influenced by opportunity needs and the availability of resources The rapid advancement of Internet technology and the trend of increasing bandwidths provide an opportunity and a need for intelligent information processing thus creating an excellent opportunity for agent based computations and learning Over 40% of the papers appearing in the conference proceedings focus on the area of machine learning and intelligent agents clear evidence of growing interest in this area
