Amazon Prime Shipping Late:

The Cost of Free Shipping Jake Alimahomed-Wilson, Ellen Reese, 2020-09-20 Winner of the UALE Book Award 2021

Amazon is the most powerful corporation on the planet and its CEO Jeff Bezos has become the richest person in history and one of the few people to profit from a global pandemic. Its dominance has reshaped the global economy itself. We live in the age of Amazon Capitalism. One click instant consumerism and its immense variety of products has made Amazon a worldwide household name with over 60% of US households subscribing to Amazon Prime. In turn, these subscribers are surveilled by the corporation. Amazon is also one of the world's largest logistics companies, resulting in weakened unions and lowered labor standards. The company has also become the largest provider of cloud computing services and home surveillance systems, not to mention the ubiquitous Alexa. With cutting edge analyses, this book looks at the many dark facets of the corporation, including automation, surveillance, tech work, workers' struggles, algorithmic challenges, the disruption of local democracy, and much more. *The Cost of Free Shipping* shows how Amazon represents a fundamental shift in global capitalism that we should name, interrogate, and be primed to resist.

Winning on Purpose Fred Reichheld, Darci Darnell, Maureen Burns, 2021-12-07

Great leaders embrace a higher purpose to win. The Net Promoter System shines as their guiding star. Few management ideas have spread so far and wide as the Net Promoter System (NPS). Since its conception almost two decades ago by customer loyalty guru Fred Reichheld, thousands of companies around the world have adopted it from industrial titans such as Mercedes-Benz and Cummins to tech giants like Apple and Amazon to digital innovators such as Warby Parker and Peloton. Now Reichheld has raised the bar yet again. In *Winning on Purpose*, he demonstrates that the primary purpose of a business should be to enrich the lives of its customers. Why? Because when customers feel this love, they come back for more and bring their friends, generating good profits. This is NPS 3.0, and it puts a new take on the age-old Golden Rule: treat customers the way you would want a loved one treated at the heart of enduring business success. As the compelling examples in this book illustrate, companies with superior NPS consistently deliver higher returns to shareholders across a wide array of industries. But winning on purpose isn't easy. Reichheld also explains why many NPS practitioners achieve just a small fraction of the system's full potential and he presents the newest thinking and best practices for doing NPS right. He unveils the Earned Growth Rate (EGR), the first reliable complementary accounting measure that can truly leverage the power of NPS. With keen insight and moving personal stories, Reichheld advances the thinking and practice of NPS. *Winning on Purpose* is your indispensable guide for inspiring customer love within your own teams and using Net Promoter to achieve both personal and business success.

Transition Point: From Steam to the Singularity Sean A. Culey, 2018-11-06 We live in disruptive times The world is changing faster than ever before leaving people dazed businesses struggling economies floundering and societies fracturing But why Transition Point is the result of over five years of research to establish the answer a breathtaking tale of freedom unintended consequences and disruptive technologies that starts 1000 years ago and ends up in the second half of the 21st Century Starting with an examination into the drivers of technological change and the social economic and political factors that both enable or suppress it Transition Point explains why industrialisation happened where and when it did why progress comes in waves and why the technologies in the current wave such as robotics blockchain and AI are likely to be the most disruptive of all It then addresses the million dollar question what's next What impact will this wave have on our businesses our economies and most importantly on our society Culey explores how our current trajectory could result in a new golden age but also how it is just as likely to result in a digital dictatorship of compliance and constant surveillance Finally he explains why we may soon see Homo sapiens role as the dominant species come to an end As Klaus Schwab founder of the World Economic Forum stated We stand on the brink of a technological revolution that will fundamentally alter the way we live work and relate to one another In its scale scope and complexity the transformation will be unlike anything humankind has experienced before Transition Point explains why this is happening what it means and why the decisions we make now will prove to be critical
