Antarctica Exploring A Fragile Eden:

Antarctica Jonathan Scott, Angela Scott, 2007 A beautiful large format history of a surprisingly fragile Eden A journey to Antarctica changes your life It forces you to take a long hard look at the state of our planet and its last wild places Antarctica promises man the chance to do something that he has never done before commit to the preservation of a vast wilderness simply because it exists Best known for their African safaris Jonathan and Angela Scott's other passion lies in their travels to Antarctica When the sun sets at the end of a hot day in the Mara Serengeti they long for the austere and beautiful landscape of the Antarctic A journey to the southern ocean offers an array of emblematic creatures penguins albatrosses seals and whales A spectacular number of birds flock to the breeding colonies there each year and whales gather in the southern oceans to feed during the Antarctic summer making it the perfect location for whale watching But the recent boom in tourism is only the latest in a long history of man's attempt to own and exploit this icy wilderness Weaving together the discovery stories of explorers such as Cook Shackleton Scott and Amundsen with the ecological stories of whaling mining and the greenhouse effect the Scotts reveal man's impact on this remote and austere sanctuary for wildlife Publisher's description

Oceans James Fargo Balliett, 2014-12-18 Covering 71 percent of the planet these saline bodies of water provided the unique conditions necessary for the building blocks of life to form billions of years ago This book explains how our oceans continue to support and influence life in important ways by providing the largest global source of protein in the form of fish populations by creating and influencing weather systems and by absorbing waste streams such as airborne carbon It is shown how oceans have an almost magnetic draw almost half of the world's population lives within a few hours of an ocean Although oceans are vast in size exceeding 328 million cubic miles 1 37 billion cubic kilometers they have been influenced by and have influenced humans in numerous ways The book includes three detailed case studies The first focuses on the most remote locations along the Mid Atlantic Ridge where new ocean floor is being formed twenty thousand feet underwater The second considers the Maldives a string of islands in the Indian Ocean where increasing sea levels may force residents to abandon some communities by 2020 The third describes the North Sea at the edge of the Arctic Ocean where fishing stocks have been dangerously depleted as a result of multiple nations' unrelenting removal of the smallest and largest species
