The Black Box Society Frank Pasquale, 2015-01-05 Every day corporations are connecting the dots about our personal behavior silently scrutinizing clues left behind by our work habits and Internet use The data compiled and portraits created are incredibly detailed to the point of being invasive But who connects the dots about what firms are doing with this information *The Black Box Society* argues that we all need to be able to do so and to set limits on how big data affects our lives Hidden algorithms can make or ruin reputations decide the destiny of entrepreneurs or even devastate an entire economy Shrouded in secrecy and complexity decisions at major Silicon Valley and Wall Street firms were long assumed to be neutral and technical But leaks whistleblowers and legal disputes have shed new light on automated judgment Self serving and reckless behavior is surprisingly common and easy to hide in code protected by legal and real secrecy Even after billions of dollars of fines have been levied underfunded regulators may have only scratched the surface of this

troubling behavior Frank Pasquale exposes how powerful interests abuse secrecy for profit and explains ways to rein them in Demanding transparency is only the first step An intelligible society would assure that key decisions of its most important firms are fair nondiscriminatory and open to criticism Silicon Valley and Wall Street need to accept as much accountability as they impose on others
