Space Physiology Jay C. Buckey Jr., M.D., 2006-02-09 The success of any space flight mission depends not only on advanced technology but also on the health and well-being of crew members. It combines research results with practical advice on such problems as bone loss, kidney stones, muscle wasting, motion sickness, loss of balance, orthostatic intolerance, weight loss, and excessive radiation exposure. Additional topics include pre-flight preparation, relevant gender differences, long duration medical planning, post-flight rehabilitation, and the physiology of extra-vehicular activity.
