Anthropologist On Mars:

An Anthropologist on Mars Oliver Sacks, 2012-11-14 From the bestselling author of *The Man Who Mistook His Wife for a Hat* Fascinating portraits of neurological disorder in which men women and one extraordinary child emerge as brilliantly adaptive personalities whose conditions have not so much debilitated them as ushered them into another reality Here are seven detailed narratives of neurological patients including a surgeon consumed by the compulsive tics of Tourette s syndrome unless he is operating an artist who loses all sense of color in a car accident but finds a new sensibility and creative power in black and white and an autistic professor who cannot decipher the simplest social exchange between humans but has built a career out of her intuitive understanding of animal behavior Sacks combines the well honed mind of an academician with the verve of a true storyteller

An Anthropologist on Mars Oliver Sacks, 2011-06-16 In *An Anthropologist on Mars* Oliver Sacks uses case studies to illustrate the myriad ways in which neurological conditions can affect our sense of self our experience of the world and how we relate to those around us Writing with his trademark blend of scientific rigour and human compassion he describes patients such as the colour blind painter or the surgeon with compulsive tics that disappear in the operating theatre patients for whom disorientation and alienation but also adaptation are inescapable facts of life An inexhaustible tourist at the farther reaches of the mind Sacks presents in sparse unsentimental prose the stories of seven of his patients The result is as rich vivid and compelling as any collection of short fictional stories Independent on Sunday Now part of the Picador Collection a series showcasing the very best of modern literature

An Anthropologist on Mars Oliver W. Sacks, 1996 Neurological patients Oliver Sacks once wrote are travellers to unimaginable lands *An anthropologist on Mars* offers portraits of seven such travellers including a British Columbia surgeon consumed by the compulsive tics of Tourette s syndrome unless he is operating an artist who loses all sense of colour in a car accident but finds a new sensibility and creative power in black and white and an autistic professor who cannot decipher the simplest social exchange between humans but has built a career out of her intuitive understanding of animal behaviour

Discussion Notes on Oliver Sacks' An Anthropologist on Mars Llewellyn Johns, 1997 **Vulnerable Subjects** G. Thomas Couser, 2018-08-06 My primary concern is with the ethics of representing vulnerable subjects persons who are liable to exposure by someone with whom they are involved in an intimate or trust based relationship unable to represent themselves in writing or unable to offer meaningful consent to their representation by someone else Of primary importance is intimate life writing that done within families or couples close relationships or quasi professional relationships that involve trust rather than conventional biography which can be written by a stranger The closer the relationship between writer and subject the greater the vulnerability or dependency of the subject the higher the ethical stakes and the more urgent the need for ethical scrutiny from the Preface *Vulnerable Subjects* explores a range of life writing scenarios from the celebrity to the

ethnographic and a number of life writing genres from parental memoir to literary case studies by Oliver Sacks G Thomas Couser addresses complex contemporary issues he investigates the role of disability in narratives of euthanasia and explores the implications of the Human Genome Project for life writing practices in any age when many regard DNA as a code that scripts lives and shapes identity Throughout his book is concerned with the ethical implications of the political and economic as well as the mimetic aspects of life writing

The Mechanics of Passion Alain Ehrenberg, 2020-09-23 Cognitive neuroscience once a specialized area of psychology and biology has enjoyed increased worldwide legitimacy in the last thirty years not only in psychiatry and mental health but also in fields as diverse as education economics marketing and law How can this surge in popularity be explained Has the new science of human behaviour now become the barometer of our conduct and our lives taking the place previously occupied by psychoanalysis Rather than asking if neuronal man will replace social man or how to surmount the opposition between the biological and the social The Mechanics of Passions uncovers hidden relationships between global social ideals and specialized concepts of neuroscience and cognitive science Proposing a historical sociology situated in the dual contexts of the history of sciences and the history of self representation Alain Ehrenberg describes the conditions through which cognitive neuroscience has developed and acquired a strong moral authority in our individualistic society permeated by ideas values and norms of autonomy Cognitive neuroscience offers the promise of turning personal limitations into assets by exploring an individual's hidden potential The Mechanics of Passions identifies this as the echo of social ideals of autonomy affirming that the moral authority of cognitive neuroscience stems as much from cultural norms as from any results of scientific or medical experimentation

Time, Technology and Environment Altamirano Marco Altamirano, 2016-02-05 Marco Altamirano critiques the modern concept of nature to chart a new trajectory for the philosophy of nature He reveals the modern origins of the epistemological configuration of nature where a subject confronts an object in space and at time t and wonders about her mode of access to that object After critiquing the spatial orientation of this concept of nature Altamirano shows that a new concept of time is necessary to reinstall the subject within its concrete ecology Altamirano goes on to deploy conceptual resources excavated from Deleuze Guattari Foucault and Leroi Gourhan to show how technology which bypasses the nature artifice distinction is an essential dimension of the philosophy of nature Ultimately this book draws the profile of a concept of nature based on time and technology that escapes the nature artifice distinction that has mired the philosophy of nature for so long
