Tomlinson, Hitomi Masuhara, 2010-11-18 This title examines current research in materials development and discusses their implications for the learning and teaching of languages Recently there has been a dramatic increase in the attention given to materials development as an academic discipline More universities are including modules on materials development on their MA in applied linguistics courses and more students are studying materials development in their PhD research Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development This fills that gap reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages The editors introduction outlines the rationale scope and objectives of the book and

reviews previously published reports of research in materials development There are concluding chapters which point out implications for second language acquisition theory and research methodology The book features suggest applications of the reported research for materials development and proposals for future action in research in materials development for language teaching

Materials Development in Language Teaching Brian Tomlinson, 2011-04-07 Materials Development in Language Teaching aims to help readers apply current theoretical principles and research findings to the practical realities of developing and exploiting classroom materials The authors also suggest new ideas and directions in materials development which readers can pursue for themselves This book is accessible to readers with little previous experience in the field and is essential reading for all those involved in developing materials for language teaching In the second edition of this highly popular title each chapter has been comprehensively revised and updated to take into account both recent research and the significant technological developments since the first edition was published in 1998 Two new chapters have been added to assess the potential of electronic media for materials development These chapters include an overview of the technologies available as well as individual case studies and activities

Developing Materials for Language Teaching Brian Tomlinson, 2014-02-13 There have been a number of books published on various aspects of materials development for language teaching but *Developing Materials for Language Teaching* is the only one which provides a comprehensive coverage of the main aspects and issues in the field This second edition brings it completely up to date and expands on the original book It deals with advances in IT and an increasingly globalized world It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world In doing so it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials The chapters are written so that the book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers publishers and applied linguists in the field The book contains updated versions of many of the chapters in the 2003 edition plus new chapters on corpus informed materials development materials development for blended learning materials development for EAP materials development for ESOL and materials development for young learners
