How to gain gain Burkhard Vogel, 2008-08-22 The 17 chapters of How to Gain Gain give a detailed insight into a collection of the most common gain producing and constant current generating possibilities 28 of triodes for audio pre amplifier purposes These chapters also offer complete sets of formulae to calculate gain frequency and phase responses of certain building blocks built up with this type of vacuum valve tube In all cases detailed derivations of the gain formulae were also presented All what is needed are the data sheet valve characteristic figures of the triode s mutual conductance the gain factor and the internal plate anode resistance To calculate frequency and phase responses of gain stages the different data sheet based input and output capacitances have to be taken into account as well To calculate transfer functions for any kind of triode driven gain stage including all its bias setting frequency and phase influencing components example MathCad worksheets as a second part of each chapter allow easy follow up and application of the respective formulae In addition to demonstrate the differences of feedback and non feedback relationships in the last

chapter and on MathCad basis a very extensive and complete calculation example for a three stage linear pre amplifier as well as a three stage RIAA equalized phono amplifier plays the wind up role of the book

Tape's Rolling Take One Adrian Kerridge, 2021-01-05 Adrian Kerridge has been part of the British recording industry for the past 50 years His revolutionary and often forthright approach within the music industry has put him at the centre of the recording world for half a century As owner of the eminent Lansdowne Studios birth place of the Dave Clark Five and home to numerous household name artists and session stories as well as the cofounding father of the CADAC console brand he witnessed first hand the technological changes of an industry transitioning from analogue tape to multi track to digital recording and editing in the 80s and forwards was a forerunner in the 60s of the then experimental practice of direct injection now widely employed by sound engineers and laid the foundations for a more modern upfront sound that was lacking in the 50s and early 60s Renown for creating unique sonic signature for bands and other recording artists Adrian s approach to recording was unlike anything the industry had seen in the years previous He recorded hot while his contemporaries were more conservative in their approach This book traces his personal journey from war time Britain to the swinging 60s taking in the technical and social changes that were to shape the way music was recorded It tells the story of a choir boy from West London who fell in love with Jazz and landed a job at a music shop A chance invitation to sit in on a studio recording of the Sydney Lipton band sparked in Adrian an interest that was to put him on a path from choir boy to the foremost Ears in the business Adrian describes how his first job at IBC London one of the UK s largest independent recording studios at the time led him to work with the legendary and sometimes volatile Joe Meek Working with Joe gave Adrian crucial insights into the talented engineer s innovative techniques which he describes in technical and personal detail After a brief stint of National Service Adrian returned to the recording industry but instead of resuming his old job at IBC he was offered a job alongside Joe Meek at a completely new London studio Lansdowne Recording Studios with producer Denis Preston who ran his own Record Supervision jazz label Adrian describes his experience of working with Joe and Denis becoming responsible for his own sessions and the studios prolific output He paints the picture of Joe s complex character as well as his ground breaking and highly successful recording techniques Joe s premature departure from Lansdowne meant Adrian suddenly found himself catapulted into the job of senior engineer and solely responsible for running the studios It was during this time that Adrian along with the Dave Clark Five led the British invasion of the U S music scene in the 1960s pioneering new audio techniques using equipment considered primitive by today s standards Adrian relates how in the early 1960s the Dave Clark Five first came into the studio and how his contribution to the band s development helped create their signature Tottenham Sound He provides unique insights into the recording of numerous hits such as Glad All Over which resulted in huge success for the band knocking the Beatles song I want to hold your hand off the top of the U K charts in January 1964 going on to sell 2.5M copies Nowadays you can get a number one with 10 20 000 copies He describes his intriguing experiences in Germany and Belgium
