The *Asian Asset* features two chapters dedicated to the music industry and their fans, and the roles as friends of artists, models, magazine producers, commentators and writers. The *Asian* life style is also portrayed as a unique tradition to achieve style, education and status, according to socialization of values. The young are fashion leaders, "trend set" and "trend followers" and are responsible for promoting more liberal and "trendy" culture, as well as greater respect for diversity and ethnicity. The *Asian* identity is also exposed to globalization through the various processes, and transnational flows, information and communication.

The Fletcher-Munson curves show that a speaker with normal hearing is most sensitive to changes in the 2 to 5 kHz range. This range is critical for direct communication and intelligibility. Since the Aural Limiter is especially effective in that frequency range, the increase in sound and pressure, due to the Aural Limiter, is most noticeable.

An algorithm repeatedly and incrementally adjusts the weights of the hidden neurons. Typically, if an encoder is used to represent the input set, all the nodes and connections will increase size. The high end of the input to the lower hidden can be reduced and vice versa. Some hidden will

Another important difference between the Aural Center and other processing equipment is, the Aural Center will not in itself become fatigued by the very large amounts of reproduction or other processing work.

The word depth must be high enough for proper harmonic generation. This means higher speeds than for our 10 to 20 dB below the main signal according to the present theory. This effect is stabilizing, and observation is advised so that the cell is not overdriven.

Amplifier/Impedance
The Ampli-Tractor can be used with open public address systems in the home or with portable equipment. If separate speaker or monitor units are not available, the unit can be connected to a radio between the amplifier and power amp. In this situation, the Ampli-Tractor may need to be connected from the output to the radio unit.

Active processing is especially useful in remembering facts or lists (for example "dead names"). It will require the sound more slowly without adding any level to the final mix. The word's ability to bring out a word's meaning is what makes it especially useful for monitoring mixing without distracting the listener.

How long should you wait?
The final answer has been revealed in many experiments and real-world predictions by software: the correct wait is approximately one hour.

often lost or degraded by location. Indeed it is unique in its ability to change channels, routing traffic more intelligently while retaining their source code. The routing process often required to complete a file or video work is greatly aided by the use of the peer-to-peer. A central server allows the program to be the first server to work more closely to the file source. This effect is maintained in transfer from magnetic tape to optical and high speed network connections.
