Launius, 2019-06-25 Fifty years after the Moon landing a new history of the space race explores the lives of both Soviet and American engineers At the dawn of the space age technological breakthroughs in Earth orbit flight were both breathtaking feats of ingenuity and disturbances to a delicate global balance of power In this short book aerospace historian Roger D Launius concisely and engagingly explores the driving force of this era the race to the Moon Beginning with the launch of Sputnik 1 in October 1957 and closing with the end of the Apollo program in 1972 Launius examines how early space exploration blurred the lines between military and civilian activities and how key actions led to space firsts as well as crushing failures Launius places American and Soviet programs on equal footing following American aerospace engineers Wernher von Braun and Robert Gilruth their Soviet counterparts Sergei Korolev and Valentin Glushko and astronaut Buzz Aldrin and cosmonaut Alexei Leonov to highlight key actions that led to various successes failures and ultimately the American Moon landing **The Apollo Missions for Kids** Jerome Pohlen, 2019-06-04 In 1961 President Kennedy issued a challenge before the end of the decade the United States would land a person on the moon and return him safely to Earth a bold proclamation at the time given that only one US astronaut had ever been to space for just 15 minutes To answer President Kennedy's call NASA embarked on the Apollo missions a complicated dangerous and expensive adventure involving 400 000 people Before the missions were over NASA astronauts had made eleven Apollo flights six of which landed on the moon and eight astronauts had lost their lives The Apollo Missions for Kids tells the story of this pivotal era in space exploration from the perspective of those who lived it the astronauts and their families the controllers and engineers and the technicians and politicians who made the impossible possible The book includes a time line resources for further study and places to visit to see Apollo mission artifacts along with 21 hands on activities to better understand the missions and the science behind them Kids will Determine what they would weigh on the moon Learn to identify the moon's features Demonstrate orbital mechanics with a marble and a shallow bowl Calculate how far away the moon is using sports equipment Recreate the shape and size of the command module Eat like an astronaut and make space food Design a mission patch And much more You Choose: The Race to the Moon Allison Louise Lassieur, 2014 It's the 1950s and 1960s and the United States and Soviet Union are in a race to be the first to reach the moon Will you Participate in the space race as a young scientist working on early rocket technology Experience the space race as a reporter following space firsts in both the Soviet Union and the United States Work as a member of Mission Control during the 1969 moon landing Everything in this book happened to real people And YOU CHOOSE what you do next The choices you make could lead you to opportunity to glory to shattered dreams or even to death *The Race to the Moon Chronicled in Stamps, Postcards, and Postmarks* Umberto Cavallaro, 2018-10-05 The story of the famed race to the Moon between the US and the USSR has been told countless times The strategies of these two superpowers have often been paralleled in a way that

highlights their fight for dominance and efforts to develop needed new technologies This book will show how beneath these surface similarities the two competing nations employed very different core tactics It provides a new perspective of the history of the space race by analyzing that history through philately that is from the images on postage stamps post cards and letters in circulation at that time Through this fascinating historical visual record the author shows how the propaganda heavy approach of the USSR eventually lost out to the more pragmatic approach of the United States
