A Place In The Shade Charles Correa:

A Place in the Shade Charles Correa, 2010 Indian cities are mechanisms for social engineering more powerful than anything we have seen before They will transform this country A Place in the Shade explores architectural and urban issues in India from the house as a machine for dealing with our often hostile climate to the metaphysical role of architecture as a Model of the Cosmos This reflective provocative and consistently readable collection of essays argues that our habitat must respond to the overriding parameters of climate culture and financial resources and that our physical environment should accommodate notions of inclusion and diversity and that priceless quality of synergy which characterizes a city Charles Correa identifies the defining issues of the urbanization process that is so rapidly transforming India He writes You cannot look at cities without wandering into architecture on the one hand and politics on the other Tragically over the last few decades urban real estate has become the primary source of financing for political parties and the politicians who run them But our towns and cities are assets too precious to be squandered in this manner Like the wheat fields of Punjab and the coal fields of Bihar cities are a crucial part of our national wealth Their success or their failure will determine our future Indian cities are mechanisms for social engineering more powerful than anything we have seen before They will transform this country A Place in the Shade explores architectural and urban issues in India from the house as a machine for dealing with our often hostile climate to the metaphysical role of architecture as a Model of the Cosmos

The ineffable in Charles Correa Edoardo Narne, 2021-11-18 Charles Correa seen by many in India as a sort of guru as someone capable to transcend and grasp the ineffable reality that surrounds us has left his noteworthy architectural heritage across the globe In 2013 the Royal Institute of British Architects RIBA celebrated him as one of the greatest contemporary urban planners showcasing his work in an exhibition called Charles Correa India's greatest architect Profoundly tied to my Indian origins to me Correa has been the master over distance a personal benchmark to set my goals against He was my inspiring thinker architect and urbanist or simply said the designer I would have liked to be Many of Correa's last works show his deep rooted search of the highest spiritual dimension in the attempt to trap part of the cosmic energy surrounding us into architectural works that were and are the shadow of his soul

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to

material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies

The Oxford Handbook of Ethics of AI

Markus D. Dubber, Frank Pasquale, Sunit Das, 2020-06-30 This volume tackles a quickly evolving field of inquiry mapping the existing discourse as part of a general attempt to place current developments in historical context at the same time breaking new ground in taking on novel subjects and pursuing fresh approaches The term AI is used to refer to a broad range of phenomena from machine learning and data mining to artificial general intelligence The recent advent of more sophisticated AI systems which function with partial or full autonomy and are capable of tasks which require learning and intelligence presents difficult ethical questions and has drawn concerns from many quarters about individual and societal welfare democratic decision making moral agency and the prevention of harm This work ranges from explorations of normative constraints on specific applications of machine learning algorithms today in everyday medical practice for instance to reflections on the potential status of AI as a form of consciousness with attendant rights and duties and more generally still on the conceptual terms and frameworks necessarily to understand tasks requiring intelligence whether human or AI

Abundance Not Capital Angelika Fitz, Elke Krasny, Architekturzentrum Wien, 2025-08-26 What if architecture were not an instrument of capital How to imagine and build a non extractivist and non exploitative architecture Capital s voracious appetite forces architecture into a regime of never enough The current realities of building involve extraction and exploitation which in turn cause climate breakdown environmental ruin alienated labor conditions and the destruction of local construction knowledge But what if we could do architecture differently What does non extractivist architecture look like In this book Angelika Fitz and Elke Krasny introduce the concept of abundance to call for a paradigm shift in architecture Using as its example the exceptional work of architect Anupama Kundoo this book shows that non extractivist and non exploitative architecture is undeniably possible Kundoo born in Pune India weaves together innovative technological experimentation and traditional crafts With careful consideration of local resources building skills climate and environment she makes buildings that embody spatial beauty and graceful materiality Abundance Not Capital is a manifesto for creating a future forward alternative architecture Contributors Shumi Bose Jordan Carver Peggy Deamer Madhavi Desai Angelika Fitz Rupali Gupte Ranjit Hoskote Elke Krasny Charlotte Malterre Barthes Shannon Mattern and Laurie Parsons Copublished with Architekturzentrum Wien
