Smart Digital Manufacturing Rene Wolf,Raffaello Lepratti,2020-10-02 The world progresses toward Industry 4.0 and manufacturers are challenged to successfully navigate this unique digital journey To some digitalization is a golden opportunity to others it is a necessary evil But to optimist and pessimist alike there is a widespread puzzlement over the practical details of digitalization To many manufacturers digital transformation is a vague and confusing concept they nevertheless must grapple with in order to survive the Fourth Industrial Revolution The proliferation of digital manufacturing technologies adds to the confusion leaving many manufacturers perplexed and unprepared with little real insight into how emerging technologies can help them sustain a competitive edge in their markets This book effectively conveys Siemens's knowledge and experience through a concept called Smart Digital Manufacturing a stepwise approach to realizing the promise of the Fourth Industrial Revolution The Smart Digital Manufacturing roadmap provides guidance and enables low risk high reward adoption of new manufacturing software technologies through a series of tipping point investment decisions

that result in optimized manufacturing performance The book provides readers with a clear understanding of what digital technology has to offer them and how and when to invest in these essential components of tomorrow s factories Ren Wolf is Senior Vice President of Manufacturing Operations Management Software for Siemens Digital Industries Software a business unit of the Siemens Digital Factory Division Raffaello Lepratti is Vice President of Business Development and Marketing for Siemens Digital Industries Software

Boating ,1992-01 *Guide to Distributed Simulation with HLA* Okan Topçu,Halit Oğuztüzün,2017-07-27 This invaluable textbook reference provides a hands on guide to the application of good software development practices to the construction of distributed simulation systems with a particular focus on High Level Architecture HLA Emphasizing a learning by doing approach supported by examples the text offers practical advice on real world development issues for all engineers and programmers entering the field Topics and features explains how to rapidly develop an HLA federation offering an implemented sample for each service area of the HLA federate interface specification describes this implementation using the freely available software tools SimGe and RACoN provides numerous step by step examples code snippets and case studies as well as links to downloadable sample source code uses the Microsoft NET platform and the C programming language in all examples and case studies includes review questions throughout the book for further study examines not only federate application development but also object model construction discusses the employment of HLA in multi agent simulations Providing an accessible introduction and all in one resource for HLA based distributed simulation development this book is an essential guide for students and practitioners training in distributed simulation and distributed interactive simulation
