Psychological and Medical Perspectives on Fertility Care and Sexual Health Kim Bergman, William D. Petok, 2021-10-21 Psychological and Medical Perspectives on Fertility Care and Sexual Health provides the necessary specialized training of sexual dysfunction and sex therapy to those in reproductive medicine. Understanding and knowledge about these sexual dysfunctions is needed for reproductive specialists to identify sexual problems, provide treatment if they are able, or make appropriate referrals and coordinate care for more specialized and specific needs as part of the patient's overall reproductive medical management. This must have reference explores the intimate interface of sexuality and fertility, male and female sexual function, cultural influences on women, Eastern medicine, and more. Provides the first of its kind book for clinicians that summarizes literature and interventions and brings together the current researchers and thinkers on this topic. Explores diverse populations typically left out, including lesbian, gay, bisexual, transgender individuals, women, and people of color. Presents a treatment dilemma for many health care providers: should one condition be treated before the other, or should concurrent services be offered? Identifies common sexual problems/dysfunctions presented by infertility patients. Describes interventions for these problems and identifies resources for appropriate treatment of sexual dysfunction.

Facing Cancer and the Fear of Death Norman Straker, 2012-12-27 In *Facing Cancer and the Fear of Death*, A Psychoanalytic Perspective on Treatment, Dr. Norman Straker proposes that death anxiety is responsible for the American society's failure to address costly, futile care at the end of life. More specifically, doctors default on the appropriate prescription of palliative care because of this anxiety. This leads to unnecessary suffering for terminally ill patients and their families and significant distress for physicians. To address these challenges in the culture of medical education, increased

psychological support for physicians who treat dying patients is necessary. Additionally, physicians need to reach a consensus regarding the discontinuation of active treatments. Psychoanalysts have traditionally denied the importance of death anxiety and report relatively few treatment cases of dying patients in their literature. This book offers multiple treatment reports by psychoanalysts that illustrate the effectiveness and value of a flexible approach to patients facing death. The psychoanalytic reader is expected to gain a greater level of comfort with facing death and is encouraged to consider making themselves more available to the ever-increasing population of cancer survivors. Further, psychoanalysts are encouraged to be more useful partners to the oncologists that are burdened by the irrational feelings of all parties. **Routledge International**
