A More Perfect Heaven How Copernicus Revolutionized The Cosmos:

A More Perfect Heaven Dava Sobel, 2011-10-04 By 1514 the reclusive cleric Nicolaus Copernicus had written and hand copied an initial outline of his heliocentric theory in which he defied common sense and received wisdom to place the sun not the earth at the center of our universe and set the earth spinning among the other planets Over the next two decades Copernicus expanded his theory through hundreds of observations while compiling in secret a book length manuscript that tantalized mathematicians and scientists throughout Europe For fear of ridicule he refused to publish In 1539 a young German mathematician Georg Joachim Rheticus drawn by rumors of a revolution to rival the religious upheaval of Martin Luther's Reformation traveled to Poland to seek out Copernicus Two years later the Protestant youth took leave of his aging Catholic mentor and arranged to have Copernicus's manuscript published in 1543 as *De revolutionibus orbium coelestium* On the Revolutions of the Celestial Spheres the book that forever changed humankind's place in the universe In her elegant compelling style Dava Sobel chronicles as nobody has the conflicting personalities and extraordinary discoveries that shaped the Copernican Revolution At the heart of the book is her play *And the Sun Stood Still* imagining Rheticus's struggle to convince Copernicus to let his manuscript see the light of day As she achieved with her bestsellers *Longitude* and *Galileo's Daughter* Sobel expands the bounds of narration giving us an unforgettable portrait of scientific achievement and of the ever present tensions between science and faith

A More Perfect Heaven Dava Sobel, 2011-09-05 The bestselling author of *Longitude* and *Galileo's Daughter* tells the story of Nicolaus Copernicus and the revolution in astronomy that changed the world Lively inventive a masterly specimen of close range cultural history Wall Street Journal Fantastic A masterly telling of how Copernicus revolutionised science The Times In the 1520s a Polish cleric named Nicolaus Copernicus developed a revolutionary theory which placed the Sun not the Earth at the centre of our universe The secret existence of this manuscript tantalised scientists everywhere in Europe Then in 1539 a young German mathematician Rheticus travelled to meet Copernicus in the hope of setting eyes on it Dava Sobel tells the story of a new concept of the heavens and how Rheticus persuaded the cautious Copernicus to allow him to take the precious but dangerous manuscript out into a world that it would change for ever In her compelling style Dava Sobel chronicles the history of the Copernican Revolution relating the story of astronomy from Aristotle to the Middle Ages And as she achieved with her international bestsellers *Longitude* and *Galileo's Daughter* in *A More Perfect Heaven* Sobel expands the bounds of popular science writing giving us an unforgettable portrait of a major step forward in the human knowledge of our universe

A More Perfect Heaven Dava Sobel, 2012-10-01 The bestselling author of *Longitude* and *Galileo's Daughter* tells the story of Nicolaus Copernicus and the revolution in astronomy that changed the world

Kepler and the Universe: How One Man Revolutionized Astronomy David K.

Love, 2024-11-20 A SCIENTIST AS IMPORTANT AS COPERNICUS GALILEO AND NEWTON Carl Sagan described Johannes Kepler as the first astrophysicist and the last scientific astrologer Indeed Kepler was responsible for a number of firsts he

was the first to suggest that the planets were controlled by a physical force emanating from the Sun and to discover the laws governing their motion In optics he was the first to explain why corrective lenses improved vision In this lively and informative biography of an important though sometimes overlooked astronomer of the seventeenth century David K Love clearly explains for the lay reader the importance of Kepler s discoveries for our modern scientific understanding The Copernicus Complex Caleb Scharf,2014-09-09 Longlisted for the 2015 PEN E O Wilson Literary Science Writing Award Short listed for Physics World s Book of the Year The Sunday Times UK Best Science Book of 2014 A Publishers Weekly Top 10 Science Book of Fall 2014 An NBC News Top Science and Tech Book of 2014 A Politics Prose 2014 Staff Pick In the sixteenth century Nicolaus Copernicus dared to go against the establishment by proposing that Earth rotates around the Sun Having demoted Earth from its unique position in the cosmos to one of mediocrity Copernicus set in motion a revolution in scientific thought This perspective has influenced our thinking for centuries However recent evidence challenges the Copernican Principle hinting that we do in fact live in a special place at a special time as the product of a chain of unlikely events But can we be significant if the Sun is still just one of a billion trillion stars in the observable universe And what if our universe is just one of a multitude of others a single slice of an infinity of parallel realities In The Copernicus Complex the renowned astrophysicist Caleb Scharf takes us on a scientific adventure from tiny microbes within the Earth to distant exoplanets probability theory and beyond arguing that there is a solution to this contradiction a third way of viewing our place in the cosmos if we weigh the evidence properly As Scharf explains we do occupy an unusual time in a 14 billion year old universe in a somewhat unusual type of solar system surrounded by an ocean of unimaginable planetary diversity hot Jupiters with orbits of less than a day planet size rocks spinning around dead stars and a wealth of alien super Earths Yet life here is built from the most common chemistry in the universe and we are a snapshot taken from billions of years of biological evolution Bringing us to the cutting edge of scientific discovery Scharf shows how the answers to fundamental questions of existence will come from embracing the peculiarity of our circumstance without denying the Copernican vision With characteristic verve Scharf uses the latest scientific findings to reconsider where we stand in the balance between cosmic significance and mediocrity order and chaos Presenting a compelling and bold view of our true status The Copernicus Complex proposes a way forward in the ultimate quest determining life s abundance not just across this universe but across all realities

Paradise Lost and the Cosmological Revolution Dennis Danielson,2014-11-06 This volume brings John Milton s *Paradise Lost* into dialogue with the challenges of cosmology and the world of Galileo whom Milton met and admired a universe encompassing space travel an earth that participates vibrantly in the cosmic dance and stars that are world s Of destined habitation Milton s bold depiction of our universe as merely a small part of a larger multiverse allows the removal of hell from the center of the earth to a location in the primordial abyss In this wide ranging work Dennis Danielson lucidly unfolds early modern cosmological debates engaging not only Galileo but also Copernicus Tycho Kepler and the English Copernicans

thus placing Milton at a rich crossroads of epic poetry and the history of science *Scientists and Inventors of the Renaissance* Britannica Educational Publishing,2012-12-01 The ingenuity evidenced during the Renaissance was not just limited to the fine arts A number of scientists and inventors also made astonishing breakthroughs in astronomy medicine physics and more Readers examine the scientific revolution profiling Isaac Newton Nicolaus Copernicus Galileo and many other great thinkers who transformed the scientific and mechanical worlds **Renaissance Humanism** Margaret L. King,2014-03-15 By far the best collection of sources to introduce readers to Renaissance humanism in all its many guises What distinguishes this stimulating and useful anthology is the vision behind it King shows that Renaissance thinkers had a lot to say not only about the ancient world one of their habitual passions but also about the self how civic experience was configured the arts the roles and contributions of women the new science the new world and so much more Christopher S Celenza Johns Hopkins University **This Dark Star** Charles L. Ladner,2022-05-26 This book is unique It is the first and only biographical study of the life of Thomas Digges who was a 16th century astronomer and the first to stipulate an infinite universe with countless number of stars Previously all astronomers believed that the stars were attached to a dome or shell surrounding the planets Digges shattered that illusion by observing the stars through a telescope some thirty years before Galileo As a Parliamentarian and man of affairs he was responsible for the reconstruction of Dover Harbor the largest public works project during the Elizabethan era and he served as Muster Master General for the British Expeditionary forces assisting the Dutch in their war of independence The Scientists: An Epic of Discovery Andrew Robinson,2023-04-25 An intriguing and illuminating read for science buffs those fascinated by the lives and minds of great men and women and anyone curious about how we came to understand the physical world The ideas experiments and inventions of great scientists have revolutionized our understanding of the world around us Theories discoveries and technologies from relativity the genetic code and the periodic table to synthetic drugs nuclear weapons and brain scans have transformed the physical world and our lives Copernicus Crick Watson Galileo Marie Curie these are some of the forty pioneers behind modern science whose stories are explored here The scientists come from around the globe and represent multiple nationalities American English German French Dutch Czech Indian Japanese and more Often unorthodox thinkers they frequently had to struggle against hostile contemporaries to gain recognition for their ideas and discoveries All the major scientific disciplines are covered including astronomy biology biochemistry chemistry computing ecology geology medicine neurology physics and psychology as well as mathematics
