Basic Concepts Of Graph Algorithms Combinatorics For Computer Science:

Basic Concepts of Graph Algorithms S. Gill Williamson, 2014-06-30 We describe and study the interplay between intuition and the precise description of graph algorithms We learn how to use ordered rooted trees to develop and describe complex recursive algorithms Depth first search lineal spanning trees chords and backedges are used to understand complex algorithms such as those for biconnectivity and planarity More general algorithms such as orderly algorithms are discussed in detail We focus on the visualization of algorithms through the use of graphical and pictorial methods This approach is both fun and powerful preparing you to invent your own algorithms for a wide range of problems **Graph-Theoretic Concepts**

in Computer Science Ulrik Brandes, Dorothea Wagner, 2003-07-31 The 26th International Workshop on Graph Theoretic Concepts in Computer Science WG 2000 was held at Waldhaus Jakob in Konstanz Germany on 15 17 June 2000 It was organized by the Algorithms and Data Structures Group of the Department of Computer and Information Science University of Konstanz and sponsored by Deutsche Forschungsgemeinschaft DFG and Universität Konstanz The workshop aims at uniting theory and practice by demonstrating how graph theoretic concepts can be applied to various areas in computer science or by extracting new problems from applications The goal is to present recent research results and to identify and explore directions for future research The workshop looks back on a remarkable tradition of more than a quarter of a century Previous Workshops have been organized in various places in Europe and submissions come from all over the world This year 57 attendees from 13 different countries gathered in the relaxing atmosphere of Lake Constance also known as the Bodensee Out of 51 submissions the program committee carefully selected 26 papers for presentation at the workshop This selection reflects current research directions among them graph and network algorithms and their complexity algorithms for special graph classes communication networks and distributed algorithms The present volume contains these papers together with the survey presented in an invited lecture by Ingo Wegener University of Dortmund and an extended abstract of the invited lecture given by Emo Welzl ETH Zurich **Graph-Theoretic Concepts in Computer Science** Hajo
