

FINANCIAL STATEMENTS

- Financial statements are documents that are prepared to represent quantitative information that has been gathered through various business transactions.
- All financial statements list the name of the entity, the name of the financial statement, and the relevant date or period.
- The standard statements used are the Balance Sheet, the Income Statement, the Statement of Retained Earnings, and the Statement of Changes in Financial Position.

FUNCTIONS OF FINANCIAL STATEMENTS

- They contain only a generic preparation of statements.
- They are limited to the reported information on the statements.
- There is no access to detailed information.
- You must accept the opinion of the auditor (see Auditor's) regarding statements, even though they may be misleading.
- Most users cannot ask for supplemented reports because the users are small (i.e., individuals) and have no leverage.

INCOME STATEMENTS

- Income statements summarize the actual transactions that occur over the period.
- Revenues equal inflow of resources (e.g., cash) that are attributed to goods or services provided.
- Revenues include gross sales (total amount sold during period), sales returns (amount returned), sales allowances (deductions from sale price), sales discounts (discounts for quick payment), and net sales (total sales after other items are deducted from gross sales).
- Expenses are outflows that are incurred in making a profit.
- Operating expenses include all expenses related to sale of merchandise or expenses plus all costs related to business operations.
- Cost of goods sold (COGS) refers to net cost of bringing goods to market during the period.
- COGS = beginning inventory + cost of goods purchased (and/or produced) - ending inventory.
- Gross profit (gross margin) indicates amount that is available to pay operating expenses.
- Gross profit = revenues - COGS.
- Net income occurs when revenues exceed expenses.
- Net loss occurs when expenses exceed revenues.
- Non-operating income and expenses result from activities other than those for which the business was originally organized.
- Extraordinary gains or losses are significant material gains or losses which result from events that are unusual in nature and infrequent in occurrence.
- Non-recurring items are similar to extraordinary gains/losses.

BALANCE SHEET (B/S)

- A balance sheet is a picture of a firm's financial position at a point in time.
- It shows assets as well as liabilities and equity against assets.
- The B/S must balance (assets = liabilities + equity).
- Assets and liabilities are current or non-current.
- Owners' equity is the amount paid into the firm for shares and retained earnings.
- Current accounts are offsetting accounts; the asset side has credit balances, but the liability side may have credit or debit balances.

REVENUE RECOGNITION

- Revenue recognition focuses on an event where revenue is earned.
- Exchange has taken place and revenues are certain to be collected.
- The firm has exerted a substantial part of production (sales) effort; revenues can be measured objectively; the majority of total costs have been incurred; and cash will be collected with certainty.
- Revenue will be recorded at time of sale, during production, at completion of production or on receipt of cash.
- Affects accounts on balance sheet to reflect changes in liabilities, and income statement in terms of matching expenses to revenue.
