Symbolic Analysis for Automated Design of Analog

Integrated Circuits Georges Gielen, Willy M.C. Sansen, 2012-12-06 It is a great honor to provide a few words of introduction for Dr Georges Gielen s and Prof Willy Sansen s book Symbolic analysis for automated design of analog integrated circuits The symbolic analysis method presented in this book represents a significant step forward in the area of analog circuit design As demonstrated in this book symbolic analysis opens up new possibilities for the development of computer aided design CAD tools that can analyze an analog circuit topology and automatically size the components for a given set of specifications Symbolic analysis even has the potential to improve the training of young analog circuit designers and to guide more experienced designers through second order phenomena such as distortion This book can also serve as an excellent reference for researchers in the analog circuit design area and creators of CAD tools as it provides a comprehensive overview and comparison of various approaches for analog circuit design automation and an extensive bibliography The world is essentially analog in nature hence most electronic systems involve both analog and digital circuitry As the number of transistors that can be integrated on a single integrated circuit IC substrate steadily increases over time an ever increasing number of systems will be implemented with one or a few very complex ICs because of their lower production costs

Analog Circuit Design Rudy J. van de Plassche, Johan Huijsing, Willy M.C. Sansen, 2013-03-09 This book contains the extended and revised editions of all the talks of the ninth AACD Workshop held in Hotel Bachmair April 11 13 2000 in Rottach Egem Germany The local organization was managed by Rudolf Koch of Infineon Technologies AG Munich Germany The program consisted of six tutorials per day during three days Experts in the field presented these tutorials and state of the art information is communicated The audience at the end of the workshop selects program topics for the following workshop The program committee consisting of Johan Huijsing of Delft University of Technology Willy Sansen of Katholieke Universiteit Leuven and Rudy van de Plassche of Broadcom Netherlands BV Bunnik elaborates the selected topics into a three day program and selects experts in the field for presentation Each AACD Workshop has given rise to publication of a book by Kluwer entitled Analog Circuit Design A series of nine books in a row provides valuable information and good overview of all analog circuit techniques concerning design CAD simulation and device modeling These books can be seen as a reference to

those people involved in analog and mixed signal design The aim of the workshop is to brainstorm on new and valuable design ideas in the area of analog circuit design It is the hope of the program committee that this ninth book continues the tradition of emerging contributions to the design of analog and mixed signal systems in Europe and the rest of the world
