Design and Forecasting Models for Disease Management Pijush Dutta, Sudip Mandal, Korhan Cengiz, Arindam Sadhu, Gour Gopal Jana, 2025-04-15. The book provides an essential overview of AI techniques in disease management and how these computational methods can lead to further innovations in healthcare. *Design and Forecasting Models for Disease Management* is a resourceful volume of 13 chapters that elaborates on computational methods and how AI techniques can aid in smart disease management. It contains several statistical and AI techniques that can be used to acquire data on many different diseases. The main objective of this book is to demonstrate how AI techniques work for early disease detection and forecasting useful information for medical experts. As such, this volume intends to serve as a resource to elicit and elaborate on possible intelligent mechanisms for helping detect early signs of diseases. Additionally, the book examines numerous machine learning and data analysis techniques in the biomedical field that are used for detecting and forecasting disease management at the cellular level. It discusses various applications of image segmentation, data analysis techniques, and hybrid machine learning techniques for illnesses and encompasses modeling prediction and diagnosis of disease data. Audience: Researchers, engineers, and graduate students in the fields of computational biology, information technology, bioinformatics, and epidemiology.

Inflammation and Chronic Disease Arch Mainous, Frank A. Orlando, 2024-07-10. One of the most important medical discoveries of the past several decades has been that inflammatory processes are involved in not just a few select disorders but a wide variety of mental and physical health problems. Inflammation is directly linked to morbidity and mortality. Some estimates suggest that inflammation plays a key role in ischemic heart disease, stroke, cancer, diabetes mellitus, chronic kidney disease, non-alcoholic fatty liver disease, NAFLD, and autoimmune and neurodegenerative conditions. Understanding the role of inflammation has helped us better understand many chronic diseases, their progression, and potential prevention. For example, substantial advances in basic and experimental science have illuminated the role of inflammation and the underlying cellular and molecular mechanisms that contribute to atherogenesis and atherosclerosis. On a more clinical level, population-based studies have demonstrated that baseline C-Reactive Protein (CRP) levels predict future cardiovascular events.

General Practice Today Jane Wilcock, 2017-10-30. *General Practice Today* explores the GP consultation in the context of external stressors and helpers that doctors use to make best clinical decisions. Over the last 30 years, there has been a move towards mandatory training on legal aspects, risk scores, and guidance. Additionally, with widespread access to IT, there has been a huge growth in the information doctors need to know and manage. Yet today's GP has never been more time-poor or under so much pressure. All these outside considerations can seem challenging and remote for the doctor sat with their patient, yet in today's reality, they have never been more important. This book offers insight into the practical impact and importance of these external factors. It offers advice on everything from law, technology, and time management to mental health issues, ethics, religion, and culture.

exploring how to determine which issues are relevant to each individual consultation Packing each chapter with realistic examples author Jane Wilcock draws on her own extensive experience to help GPs make considered contextual decisions that enhance the health and well being of their patients This book is essential reading for any General Practitioner allied health care practitioner or trainee preparing to practice in our complex modern world Intelligent Data Engineering and Automated Learning - IDEAL 2019 Hujun Yin,David Camacho,Peter Tino,Antonio J.
