Improvements in Bio-Based Building Blocks Production Through Process Intensification and Sustainability Concepts Juan Gabriel Segovia-Hernandez, Eduardo Sanchez-Ramirez, César Ramírez-Márquez, Gabriel Contreras-Zarazúa, 2021-09-14 Improvements in Bio Based Building Blocks Production Through Process Intensification and Sustainability Concepts discusses new information on the production and cost of bio based building blocks From a technical point of view almost all industrial materials made from fossil resources can be substituted using bio based counterparts However the cost of bio based production in many cases exceeds the cost of petrochemical production In addition new products must be proven to perform at least as good as their petrochemical equivalents have a lower environmental impact meet consumer demand for environmentally friendly products factor in population growth and account for limited supplies of non renewables This book outlines the application of process intensification techniques which allow for the generation of

clean efficient and economical processes for bio based chemical blocks production Includes synthesis and process design strategies for intensified processes Describes multi objective optimization applied to the production of bio based building blocks Presents the controllability of processes where the production of bio based building blocks is involved Provides examples using aspen and MATLAB Introduces several sustainable indexes to evaluate production processes Presents process intensification techniques to improve performance in productive processes **Analysis, Synthesis, and Design of Chemical Processes** ,2003
