ABSTRACT

Objective: The objective of the present investigation is to assess the biochemical analysis in the effluent sample collected from the nearby runoff of common effluent treatment plant (CETP) at Valayampet, Vaniyambadi, Tamilnadu, India.

Methods: Biochemical characteristics of the effluent were determined as per the protocol derived by American public health association (APHA).

Results: The results indicated that effluent sample was found toxic in nature, having high BOD, COD, TDS and Cr (VI) content (3.13 mg/L).

Conclusions: As per the results obtained it was concluded that leather industry should make all attempts to reduce its impact on environment by making every effort to reuse and recycle chemical compounds.

Keywords: Tannery, Vaniyambadi, effluent, CETP, chromium.

INTRODUCTION

Tanneries are such industries which contributes a major part in water usage. Obviously the waste water from this unit contains considerable amounts of hazardous compounds and where heavy metals are very common. Today 70% of available water in India has been polluted and two thirds of illness in India is related to water-borne diseases. Effluents from the tanneries contain high concentrations of inorganic and organic chemicals and are characterized with residual COD and high TDS. Chromium salts (particularly chromium sulphate) are the most widely used tanning substances today. Hides tanned with chromium salts have a good mechanical resistance, an extraordinary dyeing suitability and a better hydrothermic resistance in comparison with hides treated with vegetable substances. Unfortunately only a fraction of the chromium salts used in the tanning process react with the skins. The rest of the salts remain in the tanning exhaust bath and are subsequently sent to a depuration plant where the chromium salts end up in the sludge [1-3]. At high concentration, Cr³⁺ salts used in tanning process exhibit toxic and carcinogenic behavior to the flora and fauna of the aquatic systems [4-5]. One of the major emerging environmental problems in the tanning industry is the disposal of chromium contaminated sludge produced as a by-product of waste water treatment.

At high concentrations chromium is toxic, mutagenic, carcinogenic and teratogenic, chromium exists in oxidation states of +2, +3 and +6. The trivalent oxidation state is the most stable form of chromium and is essential to mammals in trace concentration and relatively immobile in the aquatic system due to its low water solubility. The hexavalent chromium is much more toxic to many plants, animals and bacteria inhabiting aquatic environments [6-7].

There are more than 10 nos of CETP(s) in operation in the Vellore district, Vaniyambadi CETP is tied up with more than 100 tanneries, handling industrial effluents and discharging treated effluents in Palar river basin. There is no water flow in River Palar at present due to construction of many water reservoirs across the tributaries in Andhra Pradesh and Karnataka. Due to high permeability of riverbed, the treated effluents infiltrate into the soil and almost little (or no) discharge is visible in the river. Generally there are three types of wastewater from tanneries i.e. soaking effluent, chromium effluent and other wastewater. Soaking wastewater containing high TDS is commonly allowed for solar evaporation either in the premises or at CETPs. The effluents are generally high TDS, BOD and CETP(s) also receives chromium in significant concentrations.

Only a few CETPs are meeting the standards in terms of BOD and none of the CETPs are meeting the standard in terms of TDS as stipulated by Tamil Nadu pollution control board. None of the CETPs have been issued either consent order or direction by TNPCB [8]. The objective of the present investigation is to assess the biochemical analysis in the effluent sample collected from nearby runoff of common effluent treatment plant (CETP) at Vaniyambadi, Tamilnadu, India.

MATERIALS AND METHODS

Materials

Potassium dichromate (K₂Cr₂O₇) [Analytical grade] used for the preparation of Cr (VI) stock solution and 1, 5-diphenylcarbazide (1, 5 DPC) required for colorimetric estimation of Cr (VI) was purchased from Sigma -Aldrich Chemical Co., USA. All other reagents used were of analytical grade.

Methods

Effluent sample collection

The effluent sample from nearby runoff of common effluent treatment plant (CETP) at Valayampet, Vaniyambadi, Tamilnadu, India, was collected in sterile glass bottles, transported on ice to the laboratory for biochemical analysis.

Biochemical Analysis

Biochemical characteristics of the effluent were determined following standard methods described by American public health association (APHA) [9]. The amount of Cr (VI) in the effluent sample was determined using diphenylcarbazide (DPC) colorimetric methods with a UV-Vis spectrophotometer (Model No. 1240 - Shimadzu Japan) with 1.0 cm quartz cuvettes. Stock solution (1g/ L) of Cr (VI) was prepared by dissolving required quantity of K₂Cr₂O₇ in deionised water. This solution was further diluted to prepare different working concentrations. The pH of the solution was adjusted with 0.1 N HNO₃ and 0.1 N NaOH solutions.

RESULTS

The effluent sample collected from nearby runoff of common effluent treatment plant (CETP) at Valayampet, Vaniyambadi was analyzed for biochemical properties and results showed in Table 1. The effluent was highly acidic (pH 6.3) having high biochemical oxygen demand (983 mg/L), chemical oxygen demand (1873 mg/L), total dissolved solids (9984 mg/L) and Cr content (3.13mg/L).

Analysis Tannery Effluent Reference Avifauna

Analysis Tannery Effluent Reference Avifauna:

Analysis of Tannery Effluent with Special Reference to Avifauna Thivyanathan Nirmala, Mohamed Ali Nazeema, 2015-11-25 Bird census was carried out using total bird count method physico chemical analysis of water and soil following APHA and AAS respectively from 2009 to 2010 Effluent from sixty leather industries was released into common tannery tank at Dindigul The study area harbored eleven species of birds which is grouped under eight families and six orders The dominant herb species was *Sagittifolia Aerva lanata* and *Acalypha indica* Colour of the water sample from tannery effluent was brownish Turbidity of the water was mostly exceeding 660 mg l The electrical conductivity total dissolved solids Alkalinity PH Total hardness Calcium Magnesium Iron Manganese Ammonia Nitrite BOD COD were higher than the normal values whereas Fluoride Nitrate was lower than the normal value The sediment from the tannery effluent tank was analyzed for seven selected metals such as N P K Fe Zn Cu and Mn The present finding indicates that the soil irrigated with tannery effluent contained high levels of metallic pollutants

Ecosystem Analysis of Two Tropical Community Reservoirs of India Prof. Dr. Nirmal Kumar, J.I., Dr. Hiren B. Soni, Dr. Rita N. Kumar , Wetlands occur expansively all over the world in all the climatic zones and are appraised to harbour nearly 6 4% of the Earth s surface of which India domiciles about 18 4% of global wetlands and Gujarat 36% of country wetlands As per Millennium Ecosystem Assessment MEA wetlands deliver 45% of the world s natural productivity and ecosystem services of which the benefits are estimated at 20 trillion a year Thus wetlands exhibit enormous diversity according to their genesis geographical location water regime and chemistry dominant plants and soil or sediment characteristics Wetlands directly and indirectly support millions of people in providing services such as food fibre and raw materials storm and flood control clean water supply scenic beauty and educational and recreational benefits Apart from beneficiary contribution of wetlands to the ecosystem biotic and abiotic components and human inhabitants the very subsistence of these unique natural resources is under intimidation due to developmental activities population pressure and anthropogenic stress Globally the areal extent of wetland ecosystems ranges from 917 million hectares m ha to more than 1275 m ha with an estimated economic value of about USD 15 trillion a year Overall 1052 Sites in Europe 289 Sites in Asia 359 Sites in Africa 175 Sites in South America 211 Sites in North America and 79 Sites in Oceania region have been recognized as per international recognition for designation to be handled under protected areas It gives us an immense pleasure in presenting this comprehensive book on *Ecosystem Analysis of Two Tropical Community Reservoirs of India* This book covers an extensive research on two significant wetlands of national importance of Central Gujarat India listed in Asian Directory of Wetlands highlighting point and non point sources of pollution nutrient budget and recycling of nutrients in surface water and bottom sediments planktons as indicators and markers of pollution macrophytes as indicators of quality of wetlands suitability of habitat for waterfowl conservation and conservation and site specific management strategies for sustainable use of biotic resources with recommendations and mitigating measures We hope that

this book will be of a great help to students teachers scientists wetland conservationists policy makers and government authorities in enhancing their knowledge in the field of wetland ecology biodiversity conservation restoration and management for sustaining prevailing abiotic and biotic resources for better future *Environment in the Indian Parliament*

Analysis Tannery Effluent Reference Avifauna Introduction

Analysis Tannery Effluent Reference Avifauna Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Analysis Tannery Effluent Reference Avifauna Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Analysis Tannery Effluent Reference Avifauna : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Analysis Tannery Effluent Reference Avifauna : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Analysis Tannery Effluent Reference Avifauna Offers a diverse range of free eBooks across various genres. Analysis Tannery Effluent Reference Avifauna Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Analysis Tannery Effluent Reference Avifauna Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Analysis Tannery Effluent Reference Avifauna, especially related to Analysis Tannery Effluent Reference Avifauna, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Analysis Tannery Effluent Reference Avifauna, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Analysis Tannery Effluent Reference Avifauna books or magazines might include. Look for these in online stores or libraries. Remember that while Analysis Tannery Effluent Reference Avifauna, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Analysis Tannery Effluent Reference Avifauna eBooks for free, including popular titles. Online

Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Analysis Tannery Effluent Reference Avifauna full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Analysis Tannery Effluent Reference Avifauna eBooks, including some popular titles.

FAQs About Analysis Tannery Effluent Reference Avifauna Books

What is a Analysis Tannery Effluent Reference Avifauna PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Analysis Tannery Effluent Reference Avifauna PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Analysis Tannery Effluent Reference Avifauna PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Analysis Tannery Effluent Reference Avifauna PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Analysis Tannery Effluent Reference Avifauna PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection,

editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
