Aesthetics of Weather Madalina Diaconu, 2024-09-19 In an age of rife consumption and increasing need for consideration of sustainable social practices, an exploration of the aesthetics of weather from various angles becomes vital in shedding light on its importance to our experience of the changing world. In response, offering the first in-depth and nuanced examination of the aesthetics of weather, this book underlines the relevance the concept has for scientific communication, for fostering sustainable patterns of behaviour and for rejecting the environmentally damaging consumption of landscapes and fine weather. In addition, it provides examples taken from global contemporary popular culture whilst calling attention to the socioeconomic and political dimensions of individual experience, demonstrating and analysing our fascination with and cultural interpretations of weather phenomena in our everyday lives. Within its three sections, the volume reinvents traditional phenomenological methods to create socially, politically and historically embedded phenomenographies and explore the importance of aesthetic practices in shaping our experience of weather and climate. It also provides a deeper engagement with general topics such as the relationship between perception, emotion, imagination and cognition in our aesthetic experience of the weather, combining these with aesthetic analyses of the so-called fine weather. With its broad scope of inquiry ranging from Aristotle to eco-phenomenology, from the pioneers of scientific meteorology to contemporary art and from everyday aesthetics to geoengineering, this book argues that an aesthetics of weather, inflected by greater knowledge and the taking of a critical stance towards aestheticism, can become a valuable ally to climate ethics in the Anthropocene.
