Animation Magic 2001

Thomas Riggs

Animation Magic 2001:

Animation Magic Don Hahn, 1996 Discusses the techniques and people involved in creating Disney's animated films from the first story idea to opening night 100 Greatest American and British Animated Films Thomas S. Hischak, 2018-04-20 Animation has been a staple of the filmmaking process since the early days of cinema. Animated shorts had been produced for decades but not until 1937 did a major studio venture into animated features when Walt Disney produced *Snow White and the Seven Dwarfs*. Of the hundreds of animated feature films made since many have proven their importance over the years while also entertaining generations of audiences. There are also many recent animated movies that promise to become classics in the field. In *100 Greatest American British Animated Films* Thomas S. Hischak looks at the most innovative influential and entertaining features that have been produced since the late 1930s from traditional hand-drawn works and stop-motion films to computer-generated wonders. These movies have been selected not simply because of their popularity or critical acceptance but for their importance. Entries in this volume contain plot information, production history, critical reaction, commentary on the film's cinematic quality, a discussion of the film's influence, voice casts, production credits, songs, sequels, spin-offs, Broadway versions, and television adaptations, awards and nominations. Each movie is also discussed in the context of its original release as well as the ways in which the film has lived on in the years since. Familiar favorites and lesser-known gems are included, making the book a fascinating journey for both the avid animation fan and the everyday moviegoer. With a sweeping look at more than eight decades of movies, *100 Greatest American and British Animated Films* highlights some of the most treasured features of all time. The History of Chinese Animation Lijun Sun, 2021-02-25 China has been one of the first countries to develop its own aesthetic for dynamic images and to create animation films with distinctive characteristics. In recent years, however, and subject to the influence of Western and Japanese animation, the Chinese animation industry has experienced several new stages of development, prompting the question as to where animation in China is heading in the future. This two-volume set describes the history, present, and future of China's animation industry. The author divides the business's 95-year history into six periods and analyses each of these from an historical, aesthetic, and artistic perspective. In addition, it focuses on representative works, themes, directions, artistic styles, techniques, industrial development, government support policies, business models, the nurturing of education and talent, broadcasting systems, and animation. Scholars and students who are interested in the history of Chinese animation will benefit from this set, and it will appeal additionally to readers interested in Chinese film studies. **Discovering the Magic Kingdom** Joshua C.
