Architecture's Historical Turn Jorge Otero-Pailos, 2013-11-30 *Architecture's Historical Turn* traces the hidden history of architectural phenomenology a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question Jorge Otero Pailos shows how architectural phenomenology radically transformed how architects engaged theorized and produced history In the first critical intellectual account of the movement Otero Pailos discusses the contributions of leading members including Jean Labatut Charles Moore Christian Norberg Schulz and Kenneth Frampton For architects maturing after World War II Otero Pailos contends architectural history was a problem rather than a given Paradoxically their awareness of modernism's historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression They drew from phenomenology exploring the work of Bachelard Merleau Ponty Heidegger and Ricoeur which they translated for architectural audiences Initially the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism It helped give theory especially the theory of architectural history a new importance over practice However as Otero Pailos makes clear architectural phenomenologists could not accept the idea of theory as an end in itself In the mid 1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory Otero Pailos reveals how ultimately the rise of architectural phenomenology played a crucial double role in the rise of postmodernism creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it
