Counselling Skills for Health Professionals Philip Burnard, Jo Campling, 2013-11-11 This is the second edition of a book that I hope continues to be of practical value For counselling must always be that practical No amount of talking on its own can really make a difference if people do not end up doing something as a result of counselling The practical thread remains an important one throughout this edition Counselling Skills for Health Professionals is not just a how to do it book people are probably too complicated for that approach to be of much use Counselling is never simply a matter of learning a range of skills which you then apply in a range of settings In the end counselling is about facing the person in front of you listening to them carefully and then supporting them as they work through their problems For many problems there are no easy answers and counselling doesn't offer any quick fixes It is essentially a supportive process There are many things it cannot do It cannot change certain social and political situations It cannot cure diseases On the other hand what it can do is offer people more hope Often just the fact that there is someone who is prepared to hear your story and to listen to you is all that is needed I remain convinced that the key issue in all types of counselling is the ability to listen A Beginner's Guide to Training in Counselling & Psychotherapy Robert Bor, Stephen Palmer, 2001-09-25 This book will be of interest to anyone who may be considering training for a career in counselling and psychotherapy This text provides the reader with a considerable amount of information that may be used to select and hopefully successfully complete the right programme of study pertinent to their specific requirements It maintains a good balance of being honest about the often rigorous and intense task of completing training as well as being kindly reassuring that success can be achieved if approached in the right manner with sound advice being given throughout on how this may be carried out effectively Jacqueline A Lawrence Counselling Psychology Review This highly practical and informative book is designed for all who are considering training in counselling counselling psychology or psychotherapy To secure work within these increasingly professional and competitive fields candidates need to have the appropriate training and qualifications While theoretically and in practice the professional groups have much in common each has its own distinct training routes and qualifications which can be confusing for the newcomer A Beginner's Guide to Training in Counselling Psychotherapy sets out clearly the range of options for trainees including the professional pathways and main theoretical models available to them Drawing on their vast experience as trainers practitioners and former trainees the contributors provide insights into what to expect from training and offer clear advice to help the reader select the right training identify personal qualities which make them suitable or unsuitable make a successful application get

the most out of training This book is the ideal starting point for anyone considering training in counselling counselling psychology or psychotherapy Trainers who want to provide students with an overview of the training process will find this an excellent text to recommend as initial or pre course reading

Balancing Acts Hazel Johns, 2002-09-11 This book examines the philosophy and constructs of counselling training and the means by which students and trainers manage the complex demands placed upon them during the training process The three main sections of the book explore key aspects of being trainers the pressures and stresses involved issues of gender and power the complexities of co training elements of training academic and voluntary settings negotiated and reflective learning assessment issues arising from the functions of groups experiences of being trainees first hand accounts from practitioners of the challenges they faced in their training The counsellors trainers and supervisors who share their research and experience as reflective practitioners provide a clear analysis of the balancing act involved in any adult learning

Counselling Skills for Social Workers Hilda Loughran, 2018-11-20 Counselling skills are very powerful Really listening and providing compassionate empathy without judging is a core part of social work practice with service users This book provides a theoretically informed understanding of the core skills required to provide counselling interventions that work It provides detailed discussion of three core skills which are identified as talking and responding listening and observing and thinking Over 11 chapters these core skills are described in terms of what they mean how they can be learned and developed how they can be used and misused and most importantly how specific skills can be employed in a coherent and evidence informed counselling approach Loughran also looks in detail at the skills required to deliver interventions consistent with three approaches Motivational Interviewing Solution Focused Work and Group work Illustrative case examples and exercises offer further opportunities for reflection and exploration of self awareness as well as for practising and enhancing skills development thus making the book required reading for all social work students professionals looking to develop their counselling skills and those working in the helping professions more generally Terms such as social worker therapist and counsellor will be included as they inform counselling skills in social work
