Democracy's Discontent and Civic Learning Charles S.

White, 2018-09-01 Around the globe democracy is under assault For a dozen years global freedom has followed a downward slope according to Freedom House Once viewed as the world's model of freedom the United States has slipped in world ratings of democracy For a rising portion of the world's population faith in democracy is flagging At the same time a wave of nationalism and xenophobia is rising in the West questioning democracy's ability to meet the needs of its citizens The contributors to this volume examine democracy's discontent from a variety of perspectives What forces have produced the extreme partisanship and polarization roiling America's civic life and politics How has today's populist movement challenged democratic norms and institutions What role has social media played in democracy's discontent and its defense How do we overcome persistent racism in the face of emboldened White supremacist and anti immigrant agitation Across the pages of this book teachers teacher educators and education policy makers will recognize a common theme in responding to democracy's discontent the need to rebuild the nation's civic infrastructure Research on best practices in civic learning and engagement serve as a guide to transforming how we prepare citizens for democratic deliberation and civic action Creative and effective teaching materials and approaches await only the will to invest the needed time and support Repairing our civic infrastructure will help to restore confidence in our civic capabilities and trust in our ability to work together for the public good Without a serious recommitment to the civic mission of schools the nation will be ill prepared to defend against those within and beyond our borders who are intent on undermining democracy

Cybernetics and Systems Sergio Barile, Raul Espejo, Igor Perko, Marialuisa Saviano, 2018-12-07 Society is now facing challenges for which the traditional management toolbox is increasingly inadequate Well grounded theoretical frameworks such as systems thinking and cybernetics offer general level interpretation schemes and models that are capable of supporting understanding of complex phenomena and are not impacted by the passage of time This book serves the knowledge society to address the complexity of decision making and problem solving in the 21st century with contributions from systems and cybernetics A multi disciplinary approach has been adopted to support diversity and to develop inter and trans disciplinary knowledge within the shared thematic of problem solving and decision making in the 21st century Its conceptual thread is cyber systemic thinking and its realisation is supported by a wide network of scientists on the basis of a highly participative agenda The book provides a platform of knowledge sharing and conceptual frameworks developed with multi disciplinary perspectives which are useful to better understand the fast changing scenario and the complexity of problem solving in the present time

Future Politics Jamie Susskind, 2018-09-12 *Future Politics* confronts one of the most important questions of our time how will digital technology transform politics and society The great political debate of the last century was about how much of our collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self driving cars that refuse to drive over the speed limit Those who control these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis *Future Politics* challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control

web jul 18 2012 the triangle proportionality theorem states that if a line parallel to one side of a triangle intersects the other two sides then it divides those sides proportionally we can extend this theorem to a situation outside of triangles where we have multiple parallel lines cut by transversals
