These industry standard open source tools form the core of many bioinformatics projects both in academia and industry. The methodologies introduced are platform independent and all the examples that feature have been tested on Windows, Linux and Mac OS. *Building Bioinformatics Solutions* is suitable for graduate students and researchers in the life sciences who wish to automate analyses or create their own databases and web based tools. No prior knowledge of software development is assumed. Having worked through the book the reader should have the necessary core skills to develop computational solutions for their specific research programmes.
