Month	Kilometers	Total costs \$
July	2 000	15 000
August	2 450	18 670
September	1 850	14 091
October	1 360	12 220
November	3 000	21 460
December	3 100	22 800

Required

Using the least squares method, establish the unavoidable costs and the cost per kilometer.

2. The following cases are independent but require you to express the opportunity cost in each case:

a) Salome has a part-time job that pays her \$100 per week while attending her Diploma Programme at Harare Polytechnic College. She would like to spend a week at the Victoria Falls Special Break and her employer has agreed to give her time-off but without pay.

b) Suppose that Tsuro is considering investing a large sum of money in land that may be a site for a future retail shop. Rather than invest the funds in the land, the company could decide to invest the funds in high-grade securities. In the end, the land is acquired.

c) Steve is employed with a firm that pays him a salary of \$20 000 per annum. He is thinking of leaving the firm and go to university. Going to University would require him to give up his job and he does that.

Opportunity costs is not usually entered in accounting records of an organization but is a cost to be considered in every decision to be made by a manager.
