Autocad Mep 2013 Guide:

The Aubin Academy Master Series: AutoCAD MEP, 2012, 2013 and beyond Paul F. Aubin, Darryl McClelland, Martin Schmid, Gregg Stanley, 2012-09-25 The Aubin Academy Master Series AutoCAD MEP is a concise manual focused squarely on the rationale and practicality of the AutoCAD MEP process. The book emphasizes the process of creating projects in MEP rather than a series of independent commands and tools. The goal of each lesson is to help the reader complete their projects successfully. Tools are introduced together in a focused process with a strong emphasis on why as well as how. The text and exercises seek to give the reader a clear sense of the value of the tools and a clear indication of each tool's potential. The Aubin Academy Master Series AutoCAD MEP is a resource designed to shorten your learning curve, raise your comfort level, and most importantly, give you real life tested practical advice on the usage of the software to create mechanical, electrical, and plumbing designs and calculations. Empowered with the information within this book, the reader will have insight into how to use AutoCAD MEP to create construction documents that are reflective of their standards and expectations. This edition is designed to take the core version 2012 text and make it compatible with version 2013 by providing a 2013 format dataset download and noting differences where they occur. This book is fully compatible with version 2012, 2013, and beyond. Visit paulaubin.com for free downloads and PDF chapters.

Commercial Design Using AutoCAD 2013 Daniel John Stine, 2012-06-29

Commercial Design Using AutoCAD 2013 is designed for the architectural student using AutoCAD 2013. The intent is to provide the student with a well-rounded knowledge of tools and techniques for use in both school and industry. This text takes a project-based approach to learning AutoCAD in which the student develops a campus library. Each book comes with a CD containing numerous video presentations of the written material. The first two chapters are intended to get the reader familiar with the user interface as well as the most common menus, tools, and commands that are required to work effectively with AutoCAD 2013. By the end of chapter two, the student will be excited and prepared to take on a much larger project. Throughout the rest of the book, the student develops the campus library. Using step-by-step tutorial lessons, the library project is followed through to create FFE plans, interior elevations, schedules, and details. In these chapters, many of the additional tools and features of AutoCAD 2013 are covered in greater detail. General building codes and industry standard conventions are covered in a way that is applicable to the current exercise.
