iOS Internationalization Shawn E. Larson, 2014-12-16 Internationalize Your iOS Apps for a Global Audience Sixty percent of iPhone users worldwide aren't native English speakers; half of the Top 10 iOS app markets are non-English speaking, and app revenue in Asia is soaring while North American growth is flattening. Internationalizing your apps will make your worldwide customer base happy and give you a powerful competitive advantage in the global marketplace. Now iOS expert Shawn Larson brings together all the knowledge you need to do it. Larson takes information previously scattered across dozens of blog posts, tutorials, and book chapters and integrates it into one easy-to-navigate resource. He presents step-by-step coverage and practical code for controlling international settings, character encoding, locale and localization UI adjustments, App Store customizations, and more. You'll find a sample project in every chapter, including a major three-chapter project guiding you through several key stages of app internationalization. Coverage includes Customizing language region and locale settings including date, time, currency, quotation marks, separators, and more; Working with character sets including Unicode and ligatures; Coding for locale with NSLocale and locale-specific arguments; Systematically prepping your app for localization; Leveraging the full power of base localization; Generating .strings files and working with their key-value pairs; Localizing images and app names; Effectively using translation services and avoiding the pitfalls; Adjusting your UI to avoid clipped strings in longer languages; Using constraint settings to support right-to-left languages; Specifying App Store supported territories and pricing tiers; Localizing your App Store summary page, name, descriptions, keywords, URLs, screenshots, and EULAs. If you're an experienced Objective-C developer, *iOS Internationalization* will help you expand your iOS market worldwide and capture opportunities that would otherwise be far beyond your grasp. All sample code and completed projects may be downloaded at github.com/ShawnLa/i18n.
