Application Integration Eai B2b Bpm And Soa:

Application Integration Bernard Manouvrier, Laurent Menard, 2010-01-05 Application integration assembles methods and tools for organizing exchanges between applications and intra and inter enterprise business processes A strategic tool for enterprises it introduces genuine reactivity into information systems facing business changes and as a result provides a significant edge in optimizing costs This book analyzes various aspects of application integration providing a guide to the alphabet soup behind EAI A2A B2B BAM BPM ESB and SOA It addresses the problems of choosing between the application integration solutions and deploying them successfully It supplies guidelines for avoiding common errors exploring the differences between received wisdom and the facts on the ground The overview of IT urbanization will help introduce English speaking audiences to a powerful approach to information system flexibility developed in France A key chapter approaches the analysis and interoperation of service levels in integration projects while the discussion on deployment methodologies and ROI calculation anchors the theory in the real world Application Integration EAI B2B BPM and SOA relies on concrete examples and genuine experiences to demonstrate what works and what doesn't in this challenging topical and important IT domain

Argument Mining Mathilde Janier, Patrick Saint-Dizier, 2019-12-12 This book is an introduction to the linguistic concepts of argumentation relevant for argument mining an important research and development activity which can be viewed as a highly complex form of information retrieval requiring high level natural language processing technology While the first four chapters develop the linguistic and conceptual aspects of argument expression the last four are devoted to their application to argument mining These chapters investigate the facets of argument annotation as well as argument mining system architectures and evaluation How annotations may be used to develop linguistic data and how to train learning algorithms is outlined A simple implementation is then proposed The book ends with an analysis of non verbal argumentative discourse Argument Mining is an introductory book for engineers or students of linguistics artificial intelligence and natural language processing Most if not all the concepts of argumentation crucial for argument mining are carefully introduced and illustrated in a simple manner

Interactions on Digital Tablets in the Context of 3D Geometry Learning David Bertolo, 2016-07-14 Over the last few years multi touch mobile devices have become increasingly common However very few applications in the context of 3D geometry learning can be found in app stores Manipulating a 3D scene with a 2D device is the main difficulty of such applications Throughout this book the author focuses on allowing young students to manipulate observe and modify 3D scenes using new technologies brought about by digital tablets Through a user centered approach the author proposes a grammar of interactions adapted to young learners and then evaluates acceptability ease of use and ease of learning of the interactions proposed Finally the author studies in situ the pedagogic benefits of the use of tablets with an app based on the suggested grammar The results show that students are able to manipulate observe and modify 3D scenes using an adapted set of interactions Moreover in the context of 3D geometry learning a significant contribution has been

observed in two classes when students use such an application The approach here focuses on interactions with digital tablets to increase learning rather than on technology First defining which interactions allow pupils to realize tasks needed in the learning process then evaluating the impact of these interactions on the learning process This is the first time that both interactions and the learning process have been taken into account at the same time **Decision-Making in Crisis**

Situations Sophie Sauvagnargues,2018-12-18 This book presents concepts and methods for optimal training for decision making in crisis situations After presenting some general concepts of decision making during crisis situations it presents various innovations for optimal training such as serious games scenario design adapted animation of crisis exercises observation and debriefing of exercises related to pedagogical objectives *Asymmetric Alliances and Information Systems* Karim Said,Fadia Bahri Korbi,2017-07-31 This book explores the impact of information systems on the management of North South asymmetric strategic alliances through a series of in depth case studies which analyze different types of partnerships Positioned at the heart of the value creation process the choice of information system seems to be becoming a strategic issue which should be centered not only on the organizational decisions related to the type of alliance but also the management systems of each of the partners The authors provide an understanding of the nature of this relationship between the organizational structure and the method of information system integration in asymmetric alliances The in depth analysis of strategic alliance case studies illustrates the different methods of information system integration which are themselves linked to the organisational and structural choices of the alliance These methods are characterized by information sharing and coordination mechanisms as well as the balance of control over shared activities developed by the distinct partners

Action in Uncertainty Jean-Charles Pomerol,2023-07-31 Despite uncertainty people are born to act Faced with environmental aggression and upheaval inaction is more stressful than action What choices strategies or methods need to be implemented so that action is as effective as possible in terms of the objectives to be achieved We should not delude ourselves about the term good decision which does not have much meaning when we act in an uncertain environment and when we know the weakness of forecasts However we must know how to act and be capable of taking the most appropriate action Action in Uncertainty is a real guide to taking effective action when nothing is certain According to the different types of uncertainty what are the respective good uses of expertise and intuition How do we motivate teams and avoid cognitive bias and manipulation These themes are dealt with in clear and accessible terms to help decision makers make the right choices in a world that is more uncertain than ever The Image-Interface Everardo Reyes-Garcia,2017-11-01 Digital practices are shaped by graphical representations that appear on the computer screen which is the principal surface for designing visualizing and interacting with digital information Before any digital image or graphical interface is rendered on the screen there is a series of layers that affect its visual properties To discover such processes it is necessary to investigate software applications graphical user interfaces programming languages and code algorithms data structures and data types

in their relationship with graphical outcomes and design possibilities This book studies interfaces as images and images as interfaces It offers a comprehensible framework to study graphical representations of visual information It explores the relationship between visual information and its graphical supports taking into account contributions from fields of visual computing Graphical supports are considered as material but also as formal aspects underlying the representation of digital images on the digital screen Learning Robotics, with Robotics, by Robotics Ilaria Gaudiello, Elisabetta Zibetti, 2016-09-16

The relationship between technological and pedagogical innovation has recently created a new field of research at the crossroads between Psychology Educational Sciences and Artificial Intelligence Educational Robotics ER Through analysis of the achievable educational goals based on the technological status and specific learning modes of different types of robots it is possible to define three pedagogical paradigms learning robotics learning with robotics and learning by robotics In this book we address these three paradigms through three themes human representations of robots the acceptance and trust shown when interacting with a humanoid and learning favored by the development and programming of robots in an educational context These themes allow the authors to fully explore define and delimit this novel field of research for future application in educational and social contexts Finally the book discusses contributions and limitations which have emerged from different methodologies of research potential educational applications and concepts of human robot interaction for the development of the above paradigms Enablers for Smart Cities Amal El Fallah Seghrouchni, Fuyuki Ishikawa, Laurent Hérault, Hideyuki Tokuda, 2016-07-14

Smart cities are a new vision for urban development They integrate information and communication technology infrastructures in the domains of artificial intelligence distributed and cloud computing and sensor networks into a city to facilitate quality of life for its citizens and sustainable growth This book explores various concepts for the development of these new technologies including agent oriented programming broadband infrastructures wireless sensor networks Internet based networked applications open data and open platforms and how they can provide smart services and enablers in a range of public domains The most significant research both established and emerging is brought together to enable academics and practitioners to investigate the possibilities of smart cities and to generate the knowledge and solutions required to develop and maintain them Challenges of the Internet of Things Imad Saleh, Mehdi Ammi, Samuel Szoniecky, 2019-03-06

This book will examine the issues of IoT according to three complementary axes technique use ethics The techniques used to produce artefacts physical objects infrastructures programs algorithms software and data Big data linked data metadata ontologies are the subject of many innovations as the field of IoT is rich and stimulating Along with this technological boom IoT uses colonize new fields of application in the fields of transport administration housing maintenance health sports well being Privileged interface with digital ecosystems now at the heart of social exchanges the IoT develops a power to act whose consequences both good and bad make it difficult to assess a fair business
