Archaeology Gaynor Aaltonen, 2021-04-01 Spanning multiple eras across the entire globe this accessible book provides wonderful introduction to archaeology and the discoveries which have changed our world Piece by painstaking piece archaeology has helped us to rewrite the history of Homo sapiens Gaynor Aaltonen digs deep into major expeditions and the artifacts they uncovered from the forgotten Anasazi empire of the American southwest to the discovery of King Richard III's remains beneath a Leicester car park Topics include Submerged cities from Jamaica's Port Royal to Italy's Baicoli Technological advancements such as carbon dating Native American structures including Montezuma Castle Mayan and Aztec city states This book provides an expansive overview of human history told through the materials we have left behind

English Landscapes and Identities Chris Gosden, Chris Green, Anwen Cooper, Miranda Creswell, Victoria Donnelly, Tyler Franconi, Roger Glyde, Zena Kamash, Sarah Mallet, Laura Morley, Daniel Stansbie, Letty ten Harkel, 2021-05-06 Long before the Norman Conquest of 1066 England saw periods of profound change that transformed the landscape and the identities of those who occupied it The Bronze and Iron Ages saw the introduction of now familiar animals and plants such as sheep horses wheat and oats as well as new forms of production and exchange and the first laying out of substantial fields and trackways which continued into the earliest Romano British landscapes The Anglo Saxon period saw the creation of new villages based around church and manor with ridge and furrow cultivation strips still preserved today The basis for this volume is The English Landscapes and Identities project which synthesised all the major available sources of information on English archaeology to examine this crucial period of landscape history from the middle Bronze Age c 1500 BC to the Domesday survey c 1086 AD It looks at the nature of archaeological work undertaken across England to assess its strengths and weaknesses when writing long term histories Among many other topics it examines the interaction of ecology and human action in shaping the landscape issues of movement across the landscape in various periods changing forms of food over time an understanding of spatial scale and questions of enclosing and naming the landscape culminating in a discussion of the links between landscape and identity The result is the first comprehensive account of the English landscape over a crucial

2500 year period It also offers a celebration of many centuries of archaeological work especially the intensive large scale investigations that have taken place since the 1960s and transformed our understanding of England s past Thinking of Questions Peter Limm,2015-09-23 This is not a conventional book It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it It does this by suggesting questions and lines of questioning on a wide range of topics The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal To this end almost all questions have a list of books or articles to provide a starter for stimulating further reading Once you start you will be hooked Never stop questioning **Redescribing**

Horizontal Geographies Olaf Kühne,2024-06-08 The first book in the series provides the concept of a theoretical redefinition of horizontal geographies These denote the spatial syntheses as undertaken in various disciplines whether as regional studies area studies new regional geography and many more The basis of the redescription is philosophical neopragmatism which has occasionally been taken up in the spatial sciences but has never been differentiated into a theory driven empirical research program This development of the research program guides the present book Philosophical neopragmatism especially as conceptualized by Richard Rorty focuses in particular on contingency of society self and language which also allows spatial syntheses to be understood not as images of reality but as contingent proposals for redescribing spaces As a result of the complexity of spatial processes their horizontal geographic study requires a triangulation of theories methods researcher perspectives data and the involvement of people without expert special knowledge To highlight the contingency of the spatial syntheses the presentation of the results here especially graphic and cartographic resorts to the attitude of irony Regarding the six levels of trigangulation neopragmatism acts as a meta theoretical orientation framework Against the background of the complexity of spatial developments on the one hand and to operationalize Rorty s principle of private self creation and public solidarity on the other hand Ralf Dahrendorf s concept of life chances is drawn upon Especially in the differentiation of this concept made in this book it serves on the one hand for an understanding access of the also spatial expression of options and ligatures and on the other hand it offers a normative framework for the evaluation of socio spatial developments The reference to neopragmatic studies on spatial syntheses conducted to date and evaluated in this book shows the potential of the approach elaborated here in conceptual detail for the first time
