Attunement Alberto Perez-Gomez, 2016-07-22 How architecture can move beyond the contemporary enthusiasms for the technically sustainable and the formally dazzling to enhance our human values and capacities Architecture remains in crisis its social relevance lost between the two poles of formal innovation and technical sustainability In Attunement Alberto Pérez Gómez calls for an architecture that can enhance our human values and capacities an architecture that is connected attuned to its location and its inhabitants Architecture Pérez Gómez explains operates as a communicative setting for societies its beauty and its meaning lie in its connection to human health and self understanding Our physical places are of utmost importance for our well being Drawing on recent work in embodied cognition Pérez Gómez argues that the environment including the built environment matters not only as a material ecology but because it is nothing less than a constituent part of our consciousness To be fully self aware we need an external environment replete with meanings and emotions Pérez Gómez views architecture through the lens of mood and atmosphere linking these ideas to the key German concept of Stimmung attunement and its roots in Pythagorean harmony and Vitruvian temperance or proportion He considers the primacy of place over space the linguistic aspect of architecture the voices of architecture and the voice of the architect architecture as a multisensory not pictorial experience with Piranesi Ledoux and Hejduk as examples of metaphorical modeling and how Stimmung might be put to work today to realize the contemporary possibilities of attunement [The Architecture of Jens Fredrick Larson](#) Rod Miller, 2024-08-19 After serving with the Canadian Artillery and becoming an ace with the Royal Flying Corps American Jens Fredrick Larson settled into architecture At age 28 he began work at Dartmouth As his reputation grew he would go on to work with myriad clients and more than thirty five colleges and universities in America and elsewhere including Colby College Bucknell College Wake Forest University the City University of Paris the University of New Brunswick and the Institute for Advanced Study Princeton This text explores the history of Larson and his

career with a look at his major projects and the challenges faced late in his career when a nascent Modernism denigrated and misunderstood the meaning and value of the Georgian style *Architectural Theory, Volume 2* Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11 This second volume of the landmark Architectural Theory anthology surveys the development of architectural theory from the Franco Prussian war of 1871 until the end of the twentieth century The entire two volume anthology follows the full range of architectural literature from classical times to present transformations An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture Spans the period from 1871 to 2005 from John Ruskin and the arts and crafts movement in Great Britain through to the development of Lingang New City and the creation of a metropolis in the East China sea Organized thematically featuring general and section introductions and headnotes to each essay written by a renowned expert on architectural theory Places the work of starchitects like Koolhaas Eisenman and Lyn alongside the work of prominent architectural critics offering a balanced perspective on current debates Includes many hard to find texts and works never previously translated into English Alongside Volume I An Anthology from Vitruvius to 1870 creates a stunning overview of architectural theory from early antiquity to the twenty first century [Space Syntax](#) Laura Vaughan, John Peponis, Ruth Conroy Dalton, 2025-04-30 Professor Bill Hillier spent most of his career at The Bartlett University College London where he founded and developed with a team of colleagues an original research programme that set the study of architecture on a firm scientific basis His transformational way of thinking about buildings and cities influenced generations of scholars researchers and practitioners within the built environment disciplines and way beyond in fields ranging from archaeology and biology to physics and zoology Space Syntax Selected papers by Bill Hillier provides a canon of works that reflects the progression of Hillier s ideas from the early publications of the 1970s to his most recent work published before his death in 2019 This selection of influential works ranges from his papers on architecture as a professional and research discipline through to his later papers that present a theory of the spatial structure of the city and its social functions By bringing together writing from across his career span of half a century with specially commissioned introductions by a wide range of international experts in the field we are able to contextualise and show the range and evolution of Hillier s key ideas
