García, Félix Fernández-Peña, Carlos Gordón-Gallegos, 2021-03-19 This book presents the proceedings of the Conference on Computer Science Electronics and Industrial Engineering CSEI 2020 held in Ambato in October 2020 with participants from 15 countries and guest speakers

from Chile Colombia France Japan Spain Portugal and USA It discusses topics such as the use of metaheuristic for non deterministic problem solutions software architectures for supporting e government initiatives and the use of electronics in e learning and industrial environments It also includes contributions illustrating how new approaches on these converging research areas are impacting the development of human societies around the world into Society 5.0 As such it is a valuable resource for scholars and practitioners alike Business Analytics Richard Vidgen, Sam Kirshner, Felix Tan, 2019-09-28 This exciting new textbook offers an accessible business focused overview of the key theoretical concepts underpinning modern data analytics It provides engaging and practical advice on using the key software tools including SAS Visual Analytics R and DataRobot that are used in organisations to help make effective data driven decisions Combining theory with hands on practical examples this essential text includes cutting edge coverage of new areas of interest including social media analytics design thinking and the ethical implications of using big data A wealth of learning features including exercises cases online resources and data sets help students to develop analytic problem solving skills With its management perspective on analytics and its coverage of a range of popular software tools this is an ideal essential text for upper level undergraduate postgraduate and MBA students It is also ideal for practitioners wanting to understand the broader organisational context of big data analysis and to engage critically with the tools and techniques of business analytics **Value Management** Roger H. Davies, 2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved *Defining Excellence in Simulation Programs* Janice C. Palaganas, Juli C. Maxworthy, Chad A. Epps, Mary E. Mancini, 2014-10-07 An Official Publication of the Society for Simulation in Healthcare *Defining Excellence in Simulation Programs* aims to meet the needs of healthcare practitioners using simulation techniques for education assessment and research Increasingly simulation is an integral part of teaching and training programs in healthcare settings around the world Simulation models including virtual

simulation scenario based simulation with actors and computerized mannequins contributes to improved performance and reduced errors in patient care This text establishes working definitions and benchmarks for the field of simulation and defines the types of simulation programs while also covering program leadership funding staffing equipment and education models It provides knowledge critical to the success of simulation program management simulation educators and simulation researchers Written to appeal to the novice to advanced beginner a special section in each chapter is directed to the competent to expert programs managers educators and researchers so that this text truly can serve as the comprehensive reference for anyone in simulation
