Bodily Exchanges, Bioethics and Border Crossing

*Perspectives on giving, selling and
sharing bodies*

Edited by
Erik Allmqvist and Kristin Zeiler

Bodily Exchanges Bioethics Border Crossing

Ian Pickup

Bodily Exchanges Bioethics Border Crossing:

Bodily Exchanges, Bioethics and Border Crossing Erik Malmqvist, Kristin Zeiler, 2015-12-14 Medical therapy research and technology enable us to make our bodies or parts of them available to others in an increasing number of ways This is the case in organ tissue egg and sperm donation as well as in surrogate motherhood and clinical research Bringing together leading scholars working on the ethical social and cultural aspects of such bodily exchanges this cutting edge book develops new ways of understanding them Bodily Exchanges Bioethics and Border Crossing both probes the established giving and selling frameworks for conceptualising bodily exchanges in medicine and seeks to develop and examine another less familiar framework that of sharing A framework of sharing can capture practices that involve giving up and giving away part of one's body such as organ and tissue donation and practices that do not such as surrogacy and research participation Sharing also recognizes the multiple relationalities that these exchanges can involve and invites inquiry into the context in which they occur In addition the book explores the multiple forms of border crossing that bodily exchanges in medicine involve from the physical boundaries of the body to relational borders as can happen in surrogacy to national borders and the range of ethical issues that these various border crossings can give rise to Engaging with anthropology sociology philosophy and feminist and postcolonial perspectives this is an original and timely contribution to contemporary bioethics in a time of increasing globalization It will be of use to students and researchers from a range of humanities and social science backgrounds as well as medical and other healthcare professionals with an interest in bioethics

Bioethics Beyond Altruism Rhonda M Shaw, 2017-08-31 This book departs from conventional bioethics approaches to consider the different moral and political economies involved in the donation and transformation of human organs gametes stem cells and breastmilk Collectively the authors draw attention to the different values associated with research and therapy on body part and tissue exchange through an examination of altruism gift and commodity relations They expertly discuss issues such as the bioethical conundrums around the circulation and use of human biological materials and services as well as their legal and regulatory limits the economic benefits and health values attributed to various body parts and products and the matter of immaterial labour and affective relations between donors recipients and others involved in tissue provision Based on new empirical research this interdisciplinary collection of original and timely essays will be of interest to students and researchers in gender and cultural studies sociology anthropology science and technology studies as well as medical professionals with an interest in health and reproduction

Phenomenological Bioethics Fredrik Svenaeus, 2017-08-09 Emerging medical technologies are changing our views on human nature and what it means to be alive healthy and leading a good life Reproductive technologies genetic diagnosis organ transplantation and psychopharmacological drugs all raise existential questions that need to be tackled by way of philosophical analysis Yet questions regarding the meaning of life have been strangely absent from medical ethics so far This book brings phenomenology the main player in the continental tradition of

philosophy to bioethics and it does so in a comprehensive and clear manner Starting out by analysing illness as an embodied contextualized and narrated experience the book addresses the role of empathy dialogue and interpretation in the encounter between health care professional and patient Medical science and emerging technologies are then brought to scrutiny as endeavours that bring enormous possibilities in relieving human suffering but also great risks in transforming our fundamental life views How are we to understand and deal with attempts to change the predicaments of coming to life and the possibilities of becoming better than well or even eventually surviving death This is the first book to bring the phenomenological tradition including philosophers such as Martin Heidegger Edith Stein Maurice Merleau Ponty Jean Paul Sartre Hans Georg Gadamer Paul Ricoeur Hans Jonas and Charles Taylor to answer such burning questions

Transplantation Gothic Sara Wasson,2020-10-13 Transplantation Gothic is a shadow cultural history of transplantation as mediated through medical writing science fiction life writing and visual arts in a Gothic mode from the nineteenth century to the present The works explore the experience of donor suppliers recipients and practitioners and simultaneously express transfer related suffering and are complicit in its erasure Examining texts from Europe North America and India the book resists exoticising predatorial tissue economies and considers fantasies of harvest as both product and symbol of structural ruination under neoliberal capitalism In their efforts to articulate bioengineered hybridity these works are not only anxious but speculative The book will be of interest to academics and students researching Gothic studies science fiction critical medical humanities and cultural studies of transplantation

Existential Medicine Kevin Aho,2018-04-23 Existential Medicine explores the recent impact that the philosophies of existentialism phenomenology and hermeneutics have had on the health care professions A growing body of scholarship drawing primarily on the work of Martin Heidegger and other influential twentieth century figures such as Maurice Merleau Ponty Jean Paul Sartre and Hans Georg Gadamer has shaped contemporary research in the fields of bioethics narrative medicine gerontology enhancement medicine psychiatry and psychotherapy and palliative care among others By regarding the human body as a decontextualized object the prevailing paradigm of medical science often overlooks the body as it is lived As a result it fails to critically engage the experience of illness and the core questions of what it means and what it feels like to be ill With work from emerging and renowned scholars in the field this collection aims to shed light on these issues and the crucial need for clinicians to situate the experience of illness within the context of a patient s life world To this end Existential Medicine offers a valuable resource for philosophers and medical humanists as well as health care practitioners

Global Bodies in Grey Zones Susanne Lundin,Charlotte Krol?kke,Michael N. Petersen,Elmi Muller,2016-10-01 Global Bodies in Grey Zones departs from the current globalised market in biological material and treatments Three different forms of medical travel are in focus transplant travel fertility travel and stem cell travel The global travelling includes legally organised cross border care as well as completely illegal activities involving trafficking in bodies and body parts implicating a range of people technologies and

treatments The theoretical focus is grey zones various places where people money bodies and so on constitute components in an international market The authors are researchers from the cultural social and medical sciences They examine how people's desperation hopes and longing for health and reproduction fuel the travels

Phenomenology as Critique Andreea Smaranda Aldea, David Carr, Sara Heinämaa, 2022-03-29 Drawing on classical Husserlian resources as well as existentialist and hermeneutical approaches this book argues that critique is largely a question of method It demonstrates that phenomenological discussions of acute social and political problems draw from a rich tradition of radically critical investigations in epistemology social ontology political theory and ethics The contributions show that contemporary phenomenological investigations of various forms of oppression and domination develop new critical analytical tools that complement those of competing theoretical approaches such as analytics of power critical theory and liberal philosophy of justice More specifically the chapters pay close attention to the following methodological themes the conditions for the possibility of phenomenology as critique critique as radical reflection and free thinking eidetic analysis and reflection of transcendental facticity and contingency of the self of others of the world phenomenology and immanent critique the self reflective dimensions of phenomenology and phenomenological analysis and self transformation and world transformation All in all the book explicates the multiple critical resources phenomenology has to offer precisely in virtue of its distinctive methods and methodological commitments and thus shows its power in tackling timely issues of social injustice

Phenomenology as Critique Why Method Matters will appeal to researchers and advanced students working in phenomenology Continental philosophy and critical theory

Ethical Challenges of Organ Transplantation Solveig Lena Hansen, Silke Schicktanz, 2021-09-03 This collection features comprehensive overviews of the various ethical challenges in organ transplantation International readings well grounded in the latest developments in the life sciences are organized into systematic sections and engage with one another offering complementary views All core issues in the global ethical debate are covered donating and procuring organs allocating and receiving organs as well as considering alternatives Due to its systematic structure the volume provides an excellent orientation for researchers students and practitioners alike to enable a deeper understanding of some of the most controversial issues in modern medicine

Movement of knowledge Kristofer Hansson, Rachel Irwin, 2020-11-20 Medical knowledge is always in motion It moves from the lab to the office from a press release to a patient from an academic journal to a civil servant's desk and then on to a policymaker These movements matter value judgements on the validity of certain forms of knowledge determine the direction of clinical research and policy decisions are taken in relation to existing knowledge The complexity of medical information and its wider effects is the focus of Movement of knowledge The authors address the pervasive influence of knowledge in medical and public health settings and scrutinize a range of methodological and theoretical tools to study knowledge They take a multidisciplinary approach to the medical humanities presenting both contemporary and historical perspectives in order to explore the borderlands

between expertise and common knowledge Medical knowledge is deconstructed reconstructed and transformed as it moves between patients health providers and society at large The acceptance or rejection of treatment protocols based on medical facts has a fundamental impact on us all *Animal Ethos* Lesley A. Sharp, 2018-11-06 What kinds of moral challenges arise from encounters between species in laboratory science *Animal Ethos* draws on ethnographic engagement with academic labs in which experimental research involving nonhuman species provokes difficult questions involving life and death scientific progress and other competing quandaries Whereas much has been written on core bioethical values that inform regulated behavior in labs Lesley A Sharp reveals the importance of attending to lab personnel s quotidian and unscripted responses to animals *Animal Ethos* exposes the rich yet poorly understood moral dimensions of daily lab life where serendipitous creative and unorthodox responses are evidence of concerted efforts by researchers animal technicians veterinarians and animal activists to transform animal laboratories into moral scientific worlds

Right here, we have countless books **Bodily Exchanges Bioethics Border Crossing** and collections to check out. We additionally provide variant types and then type of the books to browse.
