

Apple Intelligence Features

Is this the most important addition ever made to the iOS operating system?

System Requirements

Only iPhone 15 Pro series iPhones and above can use Apple Intelligence features.

Release Date

Apple Intelligence features aren't in the initial release of iOS 18, but will be introduced by updates throughout the year.

Apple Intelligence is arguably the most important element in this year's update to Apple's operating systems, including the iPhone's iOS 18. It helps you get even more from your iPhone by understanding how you use your smartphone and reacting accordingly. It can understand and create language and images, and take action on your behalf. It's powerful, intuitive, deeply integrated into iOS and its apps, and above all, personal.

Writing Tools

Writing Tools is an Apple Intelligence-powered feature that lets you improve your writing. It's available 'almost anywhere you write text', including Notes, Mail, Pages, Safari, Keynote and more – including third party apps. With Writing Tools, you can proofread a piece for grammar and syntax, and rewrite it to make it briefer, more personal or more professional. The Summarise option gives a short overview of what you've written, and Smart Reply reviews the contents of an email and suggests quick responses.

System-wide Writing Tools can summarise or rewrite your words.

Prioritised Notifications

With Apple Intelligence, incoming notifications can be prioritised with the most important kept at the top of the pile, minimising unnecessary distractions without hiding something that's especially important. This is achieved by analysing their content and reviewing them according to your personal context. Long text messages and emails are summarised, so you can see at a glance what the message as a whole is about.

Incoming notifications are prioritised by Apple Intelligence according to their urgency.
