Bioterrorism and Biocrimes W. Seth Carus, Center for Counterproliferation Research, 2002 During the past five years the threat of bioterrorism has become a subject of widespread concern Journalists academics and policy analysts have considered the subject and in most cases found much to alarm them Most significantly it has captured the attention of policy makers at all levels of government in the United States

Unfortunately bioterrorism remains a poorly understood subject Many policymakers and policy analysts present apocalyptic visions of the threat contending that it is only a matter of time before some terrorist uses biological agents to cause mass casualties In contrast other analysts argue that the empirical record provides no basis for concern and thus largely dismiss the potential threat Neither approach is helpful Imagining catastrophic threats inevitably leads to a requirement for impossibly large response capabilities In contrast denying the potential danger altogether leads to the kind of tunnel vision that led U S intelligence officials to totally ignore the emergence of Aum Shinrikyo in Japan despite its overtly hostile attitude towards the United States This study takes an intermediate course It provides empirical evidence to support the views of those who argue that biological agents are difficult to use It also provides abundant evidence that some people have desired to inflict mass casualties on innocent populations through employment of biological agents Fortunately these accounts also suggest that such people lacked the capability to follow through with their plans The research also casts considerable doubt on our ability to predict which biological agents a perpetrator might employ While some analysts assume that terrorists will use those agents that proved of most interest to state weapons programs bioterrorists and biocriminals have acquired and used agents of little or no value as weapons of war **Academic Library Outreach** Nancy D. Courtney,2008-12-30

Traditionally academic library outreach has meant reaching out to the campus community providing services to faculty and students Many universities and colleges however now have a new or renewed emphasis on outreach beyond the campus seeking to ensure their institutions relevance to the community at large How can and do academic libraries participate in this type of outreach What types of collaborations or partnerships are academic libraries forming with schools public libraries or community groups How do academic librarians partner with faculty or campus departments on their community projects What role does service learning play Nancy Courtney has assembled a sampling of approaches from the innovative to the tried and true each written in the voice of its strongest champion Principles and Practice of Forensic Psychiatry, 2Ed Yasuhiro Monden,2003-02-28 The second edition of this award winning textbook has been thoroughly revised and updated throughout Building on the success of the first edition the book continues to address the History and Practice of Forensic Psychiatry Legal Regulation of the Practice of Psychiatry Psychiatry in relation to Civil Law Criminal Law and Family Law Importan
