Balanced Scorecard :

The Balanced Scorecard Robert S. Kaplan, David P. Norton, 1996-08-02 The Balanced Scorecard translates a company's vision and strategy into a coherent set of performance measures. The four perspectives of the scorecard—financial measures, customer knowledge, internal business processes, and learning and growth—offer a balance between short-term and long-term objectives, between outcomes desired and performance drivers of those outcomes, and between hard objective measures and softer, more subjective measures. In the first part, Kaplan and Norton provide the theoretical foundations for the Balanced Scorecard; in the second part, they describe the steps organizations must take to build their own Scorecards; and finally, they discuss how the Balanced Scorecard can be used as a driver of change. *Balanced Scorecard Step-by-Step* Paul R. Niven, 2010-06-15 PRAISE FOR *Balanced Scorecard Step By Step* Maximizing Performance and Maintaining Results Second Edition As a practitioner and thought leader, Paul Niven is superbly bridging the gulf between BSC theory and application through hands-on experiences and real-world case studies. With this book, he has further operationalized the enlightened Balanced Scorecard concept into a fully functional system that optimizes business execution and performance. Barton Johnson, President, Financial Freedom Senior Funding Corporation. The Reverse Mortgage Specialist. The Strategy-Focused Organization Robert S. Kaplan, David P. Norton, 2000-09-13 The creators of the revolutionary performance management tool called the Balanced Scorecard introduce a new approach that makes strategy a continuous process, owned not just by top management but by everyone. In *The Strategy-Focused Organization*, Robert Kaplan and David Norton share the results of ten years of learning and research into more than 200 companies that have implemented the Balanced Scorecard. Drawing from more than twenty in-depth case studies, including Mobil, CIGNA, and AT&T Canada, Kaplan and Norton illustrate how Balanced Scorecard adopters have taken their groundbreaking tool to the next level. These organizations have used the scorecard to create an entirely new performance management framework that puts strategy at the center of key management processes and systems. Kaplan and Norton

articulate the five key principles required for building strategy focused organizations 1 translate the strategy into operational terms 2 align the organization to the strategy 3 make strategy everyone's everyday job 4 make strategy a continual process and 5 mobilize change through strong effective leadership The authors provide a detailed account of how a range of organizations in the private public and nonprofit sectors have deployed these principles to achieve breakthrough sustainable performance improvements

Performance Measurement Luca Quagini, Stefano Tonchia, 2010-08-24 Business Intelligence BI and Performance Management PM the development and delivery of business insight for users and the management of execution based on that insight are two solution types that promise to bring great value to enterprises Yet most organizations haven't yet realized the elusive benefits of these two important disciplines The reasons for this are manifold However the primary causes are the culture of the organization and its leadership This is a topic which I've addressed at length in my latest book *Pro les in Performance Business Intelligence Journeys and the Roadmap for Change*

The culture and leadership of the organization determines the importance and strategic intent surrounding the use of BI and PM. Sadly, most organizations lack the motivation to embrace transparency and accountability or to align with the strategy of the organization enabling execution and coordination in unison with the mission. However, once an organization and its leadership are ready to take a step towards real change, creating an environment of openness, sharing, and alignment with BI and PM as its centerpiece, the next question then becomes one of how and where to begin. Even with great strategic intent, missteps in the development and deployment of BI and PM can cause disillusionment and disappointment, lending support to the naysayers of the organization and leading to failure and abandonment of these critical programs.
