Baltic Biographies at Historical Crossroads Aili Aarelaid-Tart, Li Bennich-Björkman, 2012-06-12 Lying on the coastline of the Baltic Sea the small but strategically well located Baltic territories have historically found themselves in the middle of many power struggles between larger states empires and other power holders This book brings together life stories from five generations of Balts living through the diverse and recurring transformations of the 20th century occupations war independence totalitarianism and democratic rule and market economy

Artistic Practices Tasos Zembylas, 2014-04-03 Art matters It affects us in our daily lives and is full of meanings that are valuable to all of us As a catalyst for social interactions art may either cause public conflict and create dissensions or facilitate mutual understanding and strengthen collective bonds All of this is grounded in practices that develop and change along social interaction cultural dynamics as well as technological and economic lines So how is art formed and produced What are the relevant constraints and challenges that artists experience in the creative process And what constitutes artistic agency This collection of contributions from international interdisciplinary experts explores particular case studies to deeply analyse artistic practices Comprising eleven chapters relating to different art forms each chapter offers an original perspective conveying a comprehensive understanding of artistic practices as arrays of specific activities in contemporary art worlds This book will be important for both researchers and practitioners in the field It will help artists to deepen their analytical abilities enabling them to further their own creative practice It will allow students and researchers to gain insights into processes of artistic creation and thus into the reproduction of art as well as innovation in the arts

Post-identity? Richard McMahon, 2013-06-26 Collective identity the emotionally powerful sense of belonging to a group is a crucial source of popular legitimacy for nations However efforts since the 1990s to politically support European integration by using identity mechanisms borrowed from nationalism have had very limited success European integration may require new post national approaches to the relationship between culture and politics This controversial and timely volume poses the logical question if identity doesn't effectively connect culture with European integration politics what does The book brings together leading scholars from several of the disciplines that have developed concepts of culture and methods of cultural research These expert interdisciplinary contributors apply a startling diversity of approaches to culture linking it to facets of integration as varied as external policy the democratic deficit economic dynamism and the geography of integration This book examines commonalities and connections within the European space as well as representations of these in identity discourses It will be useful for students and scholars of sociology geography anthropology social psychology political science and the history of European integration

Wage Distribution Fairness in Post-Socialist Countries Zsófia Ignácz, 2017-10-30 Fairness of wage distribution or the perception of such is a phenomenon crucial for the stability of new democracies While theories exist about how change of

the political system trickles down to the attitudinal level the systematic analysis of the effect of economic transition on public attitudes has been neglected to a large extent Wage Distribution Fairness in Post Socialist Countries proposes a conceptual framework to measure the fairness of wage distribution Indeed looking particularly at wage distribution fairness in three post socialist societies Hungary East Germany Czech Republic since the transition in 1989 this challenging monograph also aims to understand if and to what extent the experience of a socialist regime motivates individuals to consider wage distribution as fair Contributing to our understanding of the relevance of socialization and other situational factors influencing economic legitimacy Wage Distribution Fairness in Post Socialist Countries will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields including Sociology Eastern European Studies and Political Economics

Green European Audrone Telesiene, Matthias Gross, 2016-07-01 Green European addresses the quest for a better understanding of European type s of environmentalism This monograph focuses on public attitudes and behaviours and the culturally rooted as well as country specific differences The book addresses the wider issue that many European countries are rendered green or as having an advanced environmental awareness but the question how green are Green Europeans really is yet to be answered The book covers a variety of unique data driven comparative studies and is divided into three parts the first addresses perceptions of environmental and technological threats and risks the second part deals with environmental activism in Europe the third discusses environmental attitudes environmental concerns and their imminent link to personal pro environmental behaviour The empirical comparative nature of the contributions is enabled by data from the International Social Survey Programme ISSP
