Handbook of Advanced Multilevel Analysis Joop Hox, J. Kyle Roberts, 2011-01-11 This new handbook is the definitive resource on advanced topics related to

multilevel analysis The editors assembled the top minds in the field to address the latest applications of multilevel modeling as well as the specific difficulties and methodological problems that are becoming more common as more complicated models are developed Each chapter features examples that use actual datasets These datasets as well as the code to run the models are available on the book's website <http://www.hlm-online.com> Each chapter includes an introduction that sets the stage for the material to come and a conclusion Divided into five sections the first provides a broad introduction to the field that serves as a framework for understanding the latter chapters Part 2 focuses on multilevel latent variable modeling including item response theory and mixture modeling Section 3 addresses models used for longitudinal data including growth curve and structural equation modeling Special estimation problems are examined in section 4 including the difficulties involved in estimating survival analysis Bayesian estimation bootstrapping multiple imputation and complicated models including generalized linear models optimal design in multilevel models and more The book's concluding section focuses on statistical design issues encountered when doing multilevel modeling including nested designs analyzing cross classified models and dyadic data analysis Intended for methodologists statisticians and researchers in a variety of fields including psychology education and the social and health sciences this handbook also serves as an excellent text for graduate and PhD level courses in multilevel modeling A basic knowledge of multilevel modeling is assumed

Measurement, Design, and Analysis Elazar J. Pedhazur, Liora Pedhazur Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin's goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt

Handbook of Multilevel Analysis Jan Deleeuw, Erik Meijer, 2007-12-26 Multilevel analysis is the statistical analysis of hierarchically and non hierarchically nested data The simplest example is clustered data such as a sample of students clustered within schools Multilevel data are especially prevalent in the social and behavioral sciences and in the bio medical sciences The models used for this type of data are linear and nonlinear regression models that account for observed and unobserved heterogeneity at the various levels in the data This book presents the state of the art in multilevel analysis with an emphasis on more advanced topics These topics are discussed conceptually analyzed mathematically and illustrated by empirical examples The authors of the chapters are the leading experts in the field Given the omnipresence of multilevel data in the social behavioral and biomedical sciences this book is useful for empirical researchers in these fields
