Anti Architecture And Deconstruction:

Anti-architecture and Deconstruction Nikos Angelos Salingaros, 2004 The Emperor Has No Clothes is an old adage but in the sad case of Deconstructivism it is absolutely appropriate as Deconstructivism is really nothing more than Modernism in a new guise Modernists notably the Bauhaus aimed for the clean slate jettisoning everything that went before Yet at times they claimed links with antecedents to give a spurious historical ancestry to their aims and creations These questionable links and precedents are now being claimed for the works of Deconstructivists by sympathetic architects and their supporters

contemporary design education in architecture and allied disciplines A wide spectrum of teaching approaches and methods is utilized to reveal a theory of a trans critical pedagogy that is conceptualized to shape a futuristic thinking about design teaching Lessons learned from techniques and mechanisms for accommodation adaptation and implementation of a trans critical pedagogy in education are conceived to invigorate a new student centered evidence based design culture sheltered in a wide variety of learning settings in architecture and beyond *Making Dystopia* James Stevens Curl,2018-08-23 In *Making Dystopia* distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue **Art History: The Key**
