

The counterweight

in the space to the left of the A&J serial socket you will see the rear end of the record player's tonearm. This is where the counterweight is to be mounted.

It is easier to mount the counterweight if the tonearm is kept stably in place by the white foam material which protected it during transport.

You will find the counterweight in a tiny round cavity in the left white polystyrene packing material.

Here's how you mount the counterweight. With the counterweight's numerical scale facing you, put the counterweight onto the tonearm and turn it clockwise until the counterweight is screwed home. Do not tighten. Now turn the counterweight anticlockwise, until the figure 1.5 (grams) for the stylus pressure points up. That's it.

If you upgrade to another MMC cartridge (see 24), turn the counterweight anticlockwise until the required stylus pressure figure (1.2 or 1.0) points up.

Replace the panels over the sockets, ensuring that the cables do fit and exit through the tiny square holes at the lower right hand side of each panel. Turn the Beocenter so that the front faces you.

To set up the rest of the record player, see 4.

If you ever need to transport your Beocenter be sure to remove the counterweight and secure the tonearm in its resting position. ☐
