Architects Of The Culture Of Death:

Architects of the Culture of Death Benjamin Wiker, Donald Demarco, 2009-09-03 The phrase the Culture of Death is bandied about as a catch all term that covers abortion euthanasia and other attacks on the sanctity of life In Architects of the Culture of Death authors Donald DeMarco and Benjamin Wiker expose the Culture of Death as an intentional and malevolent ideology promoted by influential thinkers who specifically attack Christian morality s core belief in the sanctity of human life and the existence of man s immortal soul In scholarly yet reader friendly prose DeMarco and Wiker examine the roots of the Culture of Death by introducing 23 of its architects including Ayn Rand Charles Darwin Karl Marx Jean Paul Sartre Alfred Kinsey Margaret Sanger Jack Kevorkian and Peter Singer Still this is not a book without hope If the Culture of Death rests on a fragmented view of the person and an eclipse of God the future of the Culture of Life relies on an understanding and restoration of the human being as a person and the rediscovery of a benevolent God The personalism of John Paul II is an illuminating thread that runs through Architects serving as a hopeful antidote *Now and at the Hour of Our Death* Nikolas T. Nikas, Bruce W. Green, 2024-05-22 This book addresses important moral questions people commonly face when they or their loved ones experience life threatening injuries end stage illnesses or advanced old age Due to modern medical technology patients and their family members often confront such questions as What medical procedures are morally required and what procedures are optional Is providing food and water to a patient an optional medical treatment or is it basic care necessary for all human beings What roles do conscience quality of life pain and financial burden play in end of life decision making With a clear concise question and answer format this book provides moral answers to these questions and many more in the light of Catholic teaching based on Scripture and Sacred Tradition Without knowledge of medical science or familiarity with common medical terminology people can be misled or confused by authoritative sounding medical assertions even immoral ones thus the need for this easy to use guide In these pages readers can quickly find the most pressing end of life questions along with answers consistent with the moral teachings of the Church The book uses practical reasoning to reach proper moral conclusions based on correct moral principles Timely and highly practical this book addresses issues everyone will eventually face showing that making good moral decisions leads to happiness now and at the hour of our death *Architects of Death* Karen Bartlett, 2018-03-27 Topf and Sons designed and built the crematoria at the concentration camps at Auschwitz Birkenau Buchenwald Belzec Dachau Mauthausen and Gusen At its height sixty six Topf triple muffle ovens were in operation forty six of which were at Auschwitz In five years the gas chambers and crematoria of Auschwitz had been the engine of the holocaust facilitating the murder and incineration of more than one million people most of them Jews Yet such a spectacularly evil feat of engineering was designed not by the Nazi SS but by a small respectable firm of German engineers the owners and engineers of J A Topf and Sons These were not Nazi sadists but men who were playboys and the sons of train drivers They were driven not by ideology but by love affairs personal ambition and bitter

personal rivalries to create the ultimate human killing and disposal machines even at the same time as their company sheltered Nazi enemies from the death camps The intense conflagration of their very ordinary motives created work that surpassed in its inhumanity even the demands of the SS In order to fulfil their own dreams they created the ultimate human nightmare

Architect of Human Destiny R.K. Kaushik,2003-08 The book gives us a new outlook and vision to see our lives and our world through our non mystical non conventional and non dogmatic eyeglasses A must to all people for it has hoards of inspiration ethics and values

Death Orders Anna Geifman,2010-05-20 This fascinating study shows how terrorism as developed and practiced in Romanov Russia has over the past century manifested itself as the template for modern and postmodern terrorism as a universal sociocultural psychological and existential experience irrespective of particular political causes ethnic distinctions and ideological boundaries Arguing that Russia is the birthplace of modern terrorism *Death Orders The Vanguard of Modern Terrorism in Revolutionary Russia* uses the nation as a case study of psycho historical patterns of worldwide terrorist activity during the past century Key features of early 20th century Russian political extremism serve as models for terrorist experiences in other periods and regions as author Anna Geifman builds a typology of a universal phenomenon The book shows how in Russia and elsewhere terrorists objectives have degenerated from punishment of individual adversaries and attempts to intimidate political elites to indiscriminate acts of political violence It shifts attention from ideology to practices that had been previously hidden ignored or rationalized demonstrating that what terrorists say about their motives may not be what actually drives them to brutality By looking closely at Russian precedents for the general experience of modern political violence the book helps illuminate many obscure aspects of terrorism today
