Mormon's Clues James Warr, 2006-03 This book is a must for the serious student of Book of Mormon geography Written with an outside the box approach it takes a new look at the subject and proposes new locations based upon the clues given by the book s prophets The author reasons that the primary clue would be the narrow neck of

land and proposes a location for that landmark The remaining lands and cities are then located working out from this key point Proposals for the Jaredite lands are also made and the Jaredite and Nephite cultures compared and contrasted The important topics of distance direction and populations are discussed in a straight forward manner Where possible archeological sites are identified and correlated with the proposed geography A location for the Hill Cumorah is suggested and a novel method proposed for proving Book of Mormon sites The work is appropriately illustrated with helpful maps and charts A discussion of the various theories regarding Book of Mormon lands is also included

**Personal Adornment and the Construction of Identity** Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation Personal Adornment and the Construction of Identity seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives
