Beyond Human From Animality To Transhumanism:

Beyond Human Charlie Blake, Claire Molloy, Steven Shakespeare, 2012-03-08 *Beyond Human* investigates what it means to call ourselves human beings in relation to both our distant past and our possible futures as a species and the questions this might raise for our relationship with the myriad species with which we share the planet Drawing on insights from zoology theology cultural studies and aesthetics an international line up of contributors explore such topics as our origins as reflected in early cave art in the upper Palaeolithic through to our prospects at the forefront of contemporary biotechnology In the process the book positions the human in readiness for what many have characterized as our transhuman or posthuman future For if our status as rational animals or animals that think has traditionally distinguished us as apparently superior to other species this distinction has become increasingly problematic It has come to be seen as based on skills and technologies that do not distinguish us so much as position us as transitional animals It is the direction and consequences of this transition that is the central concern of *Beyond Human*

Ecosophical Aesthetics Patricia MacCormack, Colin Gardner, 2018-06-14 Inspired by the ecosophical writings of Felix Guattari this book explores the many ways that aesthetics in the forms of visual art film sculpture painting literature and the screenplay can act as catalysts allowing us to see the world differently beyond traditional modes of representation This is in direct parallel to Guattari's own attempt to break down the 19th century Kantian dialectic between man art and world in favour of a non hierarchical transversal approach to produce a more ethical and ecologically sensitive world view Each chapter author analyses artworks which critique capitalism's industrial devastation of the environment while at the same time offering affirmative imaginative futures suggested by art Including contributions from philosophers film theorists and artists this book asks How can we interact with

the world in a non dominant and non destructive way How can art catalyze new ethical relations with non human entities and the environment And crucially what part can philosophy play in rethinking these structures of interaction The Routledge Companion to Cinema and Politics Yannis Tzioumakis,Claire Molloy,2016-07-01 The Routledge Companion to Cinema and Politics brings together forty essays by leading film scholars and filmmakers in order to discuss the complex relationship between cinema and politics Organised into eight sections Approaches to Film and Politics Film Activism and Opposition Film Propaganda Ideology and the State The Politics of Mobility Political Hollywood Alternative and Independent Film and Politics The Politics of Cine geographies and The Politics of Documentary this collection covers a broad range of topics including third cinema cinema after 9 11 eco activism human rights independent Chinese documentary film festivals manifestoes film policies film as a response to the post 2008 financial crisis Soviet propaganda the impact of neoliberalism on cinema and many others It foregrounds the key debates concepts approaches and case studies that critique and explain the complex relationship between politics and cinema discussing films from around the world and including examples from film history as well as contemporary cinema It also explores the wider relationship between politics and entertainment examines cinema s response to political and social transformations and questions the extent to which filmmaking itself is a political act **A Critical Companion to Christopher Nolan** Isabelle Labrouillère,Claire Parkinson,2023-01-03 A Critical Companion to Christopher Nolan provides a wide ranging exploration of Christopher Nolan s films practices and collaborations From a range of critical perspectives this volume examines Nolan s body of work explores its industrial and economic contexts and interrogates the director s auteur status This volume contributes to the scholarly debates on Nolan and includes original essays that examine all his films including his short films It is structured into three sections that deal broadly with themes of narrative and time collaborations and relationships and ideology politics and genre The authors of the sixteen chapters include established Nolan scholars as well as academics with expertise in approaches and perspectives germane to the study of Nolan s body of work To these ends the chapters employ intersectional feminist political ideological narrative economic aesthetic genre and auteur analysis in addition to perspectives from star theory short film theory performance studies fan studies adaptation studies musicology and media industry studies Posthumous Life Jami Weinstein,Claire Colebrook,2017-03-28 Posthumous Life launches critical life studies a mode of inquiry that neither endorses nor dismisses a wave of recent turns toward life matter vitality inhumanity animality and the real Questioning the nature and limits of life in the natural sciences the essays in this volume examine the boundaries and significance of the human and the humanities in the wake of various redefinitions of what counts as life They explore the possibility of theorizing life without assuming it to be either a simple substrate or an always mediated effect of culture and difference Posthumous Life provides new ways of thinking about animals plants humans difference sexuality race gender identity the earth and the future **Screening Nature** Anat Pick,Guinevere Narraway,2013-11-01 Environmentalism and ecology are areas of rapid growth in academia and

Vandersommers, 2019-06-19 Do both the zoo and the mental hospital induce psychosis as humans are treated as animals and animals are treated as humans How have we looked at animals in the past and how do we look at them today How have zoos presented themselves and their purpose over time In response to the emergence of environmental and animal studies anthropologists sociologists philosophers theorists literature scholars and historians around the world have begun to explore the significance of zoological parks past and present Zoo Studies considers the modern zoo from a range of approaches and disciplines united in a desire to blur the boundaries between human and nonhuman animals The volume begins with an account of the first modern mental hospital La Salpêtrière established in 1656 and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work Zoo Studies will change the way readers see nonhuman animals and themselves Religion and Transhumanism Calvin Mercer, Tracy J.

Trothen, 2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the

human species The discussions are as intriguing as the future they suggest
