Beyond National Borders States Human Rights Obligations In International Cooperation:

Beyond National Borders Sigrun Skogly, 2006 Within and outside the legal and academic professions it is now increasingly recognised that the human rights consequences of states actions are not limited to the domestic sphere but quite often transcend national borders This is a challenge to the human rights community which up to the present time has focused almost exclusively on human rights violations and protections solely within a national setting The term extraterritorial effect application obligation in international law refers to acts that are taken by one actor state that have some kind of effect within another country s territory with or without this second country s implicit or explicit agreement Extraterritoriality within international human rights law then concerns actions or omissions by one state that have an effect on the human rights of individuals in another state with or without this other state s agreement This effect may be positive or negative in that such actions or omissions by foreign states may contribute positively to the enjoyment of human rights or alternatively they may result in a deteriorated human rights situation and even human rights violations This book gives for the first time a comprehensive analysis of extraterritorial obligations in international human rights law by placing the discussion in a larger international law context interpreting obligations in the various sources of international human rights law and discussing the way in which extraterritoriality has been approached by international courts and human rights implementation bodies in the United Nations and regional systems

The Human Right to Water and its Application in the Occupied Palestinian Territories Amanda Cahill Ripley, 2011-04-11 The Human Right to Water and Its Application in the Occupied Palestinian Territories provides an overview and examination of the human right to water as determined under international human rights law This is a highly topical issue with the UN General Assembly having passed a resolution which declares access to clean water and sanitation a human right New York Jul 28 2010 the recent appointment of the UN Independent Expert on the issue of human rights obligations related to access to safe drinking water and sanitation and movement within the NGO community for an international water treaty Amanda Cahill Ripley analyses the current legal status substantive content and obligations correlative to the right and examines the relationship between other economic social and cultural rights related to the right to water The book goes on to look more specifically at the application of the human right to water in the Occupied Palestinian Territories Using innovative methodology Cahill Ripley combines legal analysis with a qualitative social science empirical case study to explore the enjoyment of the right on the ground The wider implications of the case study findings are then considered looking at what can be done to strengthen the right legally in terms of its status and codification and what remedy can be found for violations of the right both specifically in the Occupied Palestinian Territories and in a more general context The book will be of interest to students academics and practitioners within the fields of international human rights law and international humanitarian law as well as those concerned with international relations and conflict resolution within Israel Palestine and the wider Middle East region

Human Rights

and Development in International Law Tahmina Karimova, 2016-04-28 This book addresses the legal issues raised by the interaction between human rights and development in contemporary international law. In particular, it charts the parameters of international law that states have to take into account in order to protect human rights in the process of development. In doing so, it departs from traditional analyses where human rights are mainly considered as a political dimension of development. Rather, the book suggests focusing on human rights as a system of international norms establishing minimum standards of protection of individuals and minimum standards applicable in all circumstances on what is essential for a dignified existence. The various dimensions covered in the book include the discourse on human rights and development interrelationship, particularly *opinio juris* and the practice of states on the question of international assistance and cooperation in human rights law under legal regimes such as international humanitarian law and emerging rules in the area of protection of persons in the event of disasters, the extraterritorial scope of economic, social and cultural rights treaties and legal principles on the respect for human rights in externally designed and planned development activities. Analysis of these topics sheds light on the question of whether international law as it stands today addresses most of the issues concerning the protection of human rights in the development process.

The book is international in perspective both in scope and context and covers developments in the international protection of human rights since the adoption of the UDHR in 1948. The developments considered include the United Nations system of protecting human rights as well as regional human rights systems in Africa, America and Europe. It also considers some key themes relevant to human rights including globalisation, protecting human rights in emergency situations and trade sanctions, the development of human rights NGOs and many others. Protection of Human Life at Sea in International Law Aphrodite

Papachristodoulou, 2025-05-30 The law of the sea imposes a long-established duty to rescue persons in distress which connotes one of the most important tools in safeguarding safety of life at sea. Other rules of international law, namely international human rights and refugee law, also come into play in drawing the legal parameters for the conduct of rescue operations. Amid the thousands of people undertaking perilous sea journeys in search of safety, European legal responses

have primarily focused on the securitization of migration This book exposes the human rights violations that may be perpetrated against migrants attempting to cross the Mediterranean and strongly advocates for the development of a framework for operationalizing the protection of human rights and life at sea It combines theory and practice in which philosophical theories of rights are applied to create a framework for legal analysis and the development of practical legal standards The study presents an innovative evaluation of selected judgments of the European Court of Human Rights and other international human rights bodies pertaining to complex questions of extraterritorial jurisdiction and a State's human rights obligations towards persons in distress at sea The book will be of interest to all those engaging with migration and security studies international human rights scholarship international law of the sea refugee and migration law and legal philosophy whether generalist or specialist

State Responsibility, Climate Change and Human Rights under International Law Margaretha Wewerinke-Singh, 2019-03-21 The last decade has witnessed an increasing focus on the relationship between climate change and human rights Several international human rights bodies have expressed concern about the negative implications of climate change for the enjoyment of human rights and the Paris Agreement is the first multilateral climate agreement to refer explicitly to states human rights obligations in connection with climate change Yet despite this there are still significant gaps in our understanding of the role of international human rights law in enhancing accountability for climate action or inaction As the Paris Agreement has shifted the focus of the climate

change regime towards voluntary action and the humanitarian impacts of climate change are increasingly being felt around the world accountability for climate change has become an increasingly salient issue This book offers a timely and comprehensive analysis of the legal issues related to accountability for the human rights impact of climate change drawing on the state responsibility regime It explains when and where state action relating to climate change may amount to a violation of human rights and evaluates various avenues of legal redress available to victims The overall analysis offers a perceptive insight into the potential of innovative rights based climate actions to shape climate and energy policies around the world
