Beyond The Threshold Beyond The Threshold:

Agricultural Libraries Information Notes, 1987 Expert Systems Cornelius T. Leondes, 2001-09-26 This six volume set presents cutting edge advances and applications of expert systems Because expert systems combine the expertise of engineers computer scientists and computer programmers each group will benefit from buying this important reference work An expert system is a knowledge based computer system that emulates the decision making ability of a human expert The primary role of the expert system is to perform appropriate functions under the close supervision of the human whose work is supported by that expert system In the reverse this same expert system can monitor and double check the human in the performance of a task Human computer interaction in our highly complex world requires the development of a wide array of expert systems Expert systems techniques and applications are presented for a diverse array of topics including Experimental design and decision support The integration of machine learning with knowledge acquisition for the design of expert systems Process planning in design and manufacturing systems and process control applications Knowledge discovery in large scale knowledge bases Robotic systems Geographic information systems Image analysis recognition and interpretation Cellular automata methods for pattern recognition Real time fault tolerant control systems CAD based vision systems in pattern matching processes Financial systems Agricultural applications Medical diagnosis **Statistics with Posterior Probability and a PHC Curve** Hideki Toyoda, 2024-06-14 This textbook reconstructs the statistics curriculum from the perspective of posterior probability In recent years there have been several reports that the results of studies using significant tests cannot be reproduced It is a problem called a reproducibility crisis For example suppose we could reject the null hypothesis that the average number of days to recovery in patients who took a new drug was the same as that in the control group However rejecting the null hypothesis is only a necessary condition for the new drug to be effective Even if the necessary conditions are met it does not necessarily mean that the new drug is effective In fact there are many cases where the effect is not reproduced Sufficient conditions should be presented such as the average number of days until recovery in patients who take new drugs is sufficiently short compared to the control group evaluated from a medical point of view without paying attention to necessary conditions This book reconstructs statistics from the perspective of PHC i e probability that a research hypothesis is correct For example the PHC curve shows the posterior probability that the statement The average number of days until recovery for patients taking a new drug is at least days shorter than that of the control group is correct as a function of Using the PHC curve makes it possible to discuss the sufficient conditions rather than the necessary conditions for being an efficient treatment The value of statistical research should be evaluated with concrete indicators such as 90% probability of being at least 3 days shorter not abstract metrics like the p value Beyond the Threshold Christopher M. Moreman, 2017-09-13 Beyond the Threshold introduces readers to afterlife beliefs and experiences in world religions The second edition has been revised and updated throughout including a new chapter on afterlife beliefs and

practices in selected African traditions new research on the afterlife and near death experiences the addition of key words and definitions to each chapter and more Christopher M Moreman offers an introduction to afterlife beliefs in ancient cultures which are essential to understanding the roots of many modern ideas about death He examines the folklore and doctrines of major world religions including Judaism Christianity Islam Hinduism Buddhism Chinese religions and several African traditions He also discusses psychic phenomena across traditions such as mediums near death and out of body experiences and past life memories While ultimately the afterlife remains unknowable the second edition of this unique in depth exploration of both beliefs and experiences can help readers reach their own understanding of the afterlife and how to live *Hearing on System-wide Education Reform* United States. Subcommittee on Elementary, Secondary, and Vocational Education,1992 **Capabilities in a Just Society** Rutger Claassen,2018-10-04 What sort of entitlements should citizens have in a just society In this book Rutger Claassen sets out a theory of what he terms navigational agency whereby citizens should be able to navigate freely between social practices This shows how individuals can be at the same time free and autonomous in striving for their own goals in life but also embedded in social practices in which they have to cooperate with others He argues that for navigational agency people need three sets of core capabilities those which allow human empowerment in civil society a decent level of socio economic subsistence and political participation in democratic decision making procedures The idea of navigational agency the book argues provides an alternative to currently dominant versions of the capability approach to social justice and strengthens its liberal foundations

Liberal Perfectionism Alexandra Couto,2014-08-19 Much of the recent literature on political perfectionism has focused on dealing with objections to this view This book adopts a different approach It attempts to highlight the intuitive appeal of liberal perfectionism by presenting a positive prima facie argument in its favour The book starts by clarifying the relation between political perfectionism a conception of politics and prudential perfectionism and ethical perfectionism a conception of the good life and a type of ethical theory It is crucial to start by selecting a plausible form of ethical perfectionism as it makes an important difference to the plausibility of the political conception based upon it Once appropriate distinctions are drawn and a plausible form of liberal perfectionism is endorsed many of the standard objections to perfectionism are shown to fail to reach their target Different arguments in favour of liberal perfectionism are then proposed and critically examined but the resilience of some pragmatic arguments against liberal perfectionism is conceded The book ends by showing that perfectionism can be surprisingly relevant for discussions of social justice and proceeds to draw a sketch of the perfectionist implications for questions of distributive justice *Fuzzy Systems and Knowledge Discovery* Lipo Wang,Yaochu

Jin,2005-08-17 This book and its sister volume LNAI 3613 and 3614 constitute the proceedings of the Second International Conference on Fuzzy Systems and Knowledge Discovery FSKD 2005 jointly held with the First International Conference on Natural Computation ICNC 2005 LNCS 3610 3611 and 3612 from August 27-29 2005 in Changsha Hunan China FSKD 2005

successfully attracted 1249 submissions from 32 countries regions the joint ICNC FSKD 2005 received 3136 submissions After rigorous reviews 333 high quality papers i e 206 long papers and 127 short papers were included in the FSKD 2005 proceedings r resenting an acceptance rate of 26 7% The ICNC FSKD 2005 conference featured the most up to date research sults in computational algorithms inspired from nature including biological e logical and physical systems It is an exciting and emerging interdisciplinary area in which a wide range of techniques and methods are being studied for dealing with large complex and dynamic problems The joint conferences also promoted cross fertilization over these exciting and yet closely related areas which had a signi cant impact on the advancement of these important technologies Speci c areas included computation with words fuzzy computation granular com tation neural computation quantum computation evolutionary computation DNA computation chemical computation information processing in cells and tissues molecular computation arti cial life swarm intelligence ants colony arti cial immune systems etc with innovative applications to knowledge d covery nance operations research and more

Lectures in Synergetics V. I. Sugakov, Igor Goliney, 1998 The world that surrounds us is a complex system of interacting objects The versatility of the links and interactions brings about the infinite multiplicity of natural phenomena Synergetics studies nonlinear nonequilibrium processes and self organization phenomena allowing for description systematization and generalization of the phenomena that are described by the different branches of natural science physics chemistry biology as well as sociology and economics This book introduces the reader to the exciting world of the nonlinear phenomena that are studied in synergetics The book comprises treatises on mathematical methods for the study of nonequilibrium processes and presents versatile phenomena studied in synergetics multistability self oscillation spatial stratification autowaves kinetic phase transitions and chaos Examples of self organization in physics chemistry biology covered in this volume include laser generation optical bistability self oscillations in semiconductors and chemical reactions spatial stratification in hydrodynamics and in crystals auto waves in semiconductors and nerve fibers and many other phenomena The majority of the phenomena considered occur in physics but the book is also useful for chemists and biologists
