An Architecture of Place Randall S. Lindstrom, 2024-06-25 Challenging mainstream architecture's understandings of place this book offers an illuminating clarification that allows the idea's centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the

ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines
